Minute Men of the Old Frontier

By AUSTIN CALLAN

(Copyright, 1936, by the Home Color Print Co.)

THE Texas Ranger of frontier days was a deadly foe to the red man. He could ride faster and shoot straighter than the average soldier of Uncle Sam's. His place in the history of the frontier is unique and his reputation as a fighting man will live forever along with that of Kipling's "Fuzzy-Wuzzy."

But there were men who rode the range in that far distant day more dreaded by savages than the rangers. They were the old-fashioned cowboys—those minute men of the frontier with cap-and-ball six-shooter and trusty pony. They helped to make the cattle country safe and blazed a pathway through the wilds for the covered wagon.

Among names that will live wherever cattle are raised and sold, is that of Felix Mann. He sat by many a campfire and stood guard around many a bellowing herd in that romantic era when Indians held sway over a great dominion, and a "puncher" had to be equally expert with lariat and with six-shooter.

Felix bought cattle for his cousin, Clay Mann, the original "bovine baron" of the old days. He was a typical frontiersman and knew every water hole from Terret Draw on the San Saba River, to Clear Fork on the Brazos River. He traded and paid for countless thousands of long-horn cattle when either silver, or gold, or currency, took the place of the present-day handy check-book and a man's bank was a pair of saddle-bags or a buckboard.

Two Contrary Mules

In his younger days Felix was on a cow hunt in the Fort McKavett country. Leaving the outfit some distance from the old military fort, he visited a girl friend who resided six miles below

there on the San Saba River. Cow horses were mostly fattened on grass, and if there were no grass there were no horses. Therefore, on this occasion, following a prolonged drouth, Felix and his companion were mounted on mules.

"I borrowed my mule from the contrariest frontiersman I ever knew," Mann said, in relating to me the story. "I found that even a mule could be ruined by a contrary cuss. Whenever I tried to get the animal to go one way he was dog-goned sure to go the other."

Marauding Indians would occasionally come into the McKavett country. They swept in on moonlight nights from remote haunts and were principally concerned in driving off the settlers' horses. Conflicts with the whites were avoided by the Indians, as a rule, although it was dangerous for any settler to travel alone. The more careful observed certain rules of precaution in going from place to place.

Signs of Marauding Indians

In the middle of the afternoon Mr. Mann and his companion left the Sheen home, on the San Saba River, intent upon returning to the cow-outfit near Fort McKavett. At sundown they stopped by the side of a water-hole to rest their horses and to partake of a little food. Just before arrival at the water-hole they had seen a split-eared pony

along the trail in a somewhat jaded condition. This aroused their suspicion and indicated that a band of Comanche Indians had passed that way, leaving behind the jaded animal.

A full moon had risen from behind the hills as Mann and his companion sat beside a smouldering camp-fire, swapping yarns. Suddenly and without warning a gaunt, man-like shadow flitted across

"Just as I pulled the trigger my mule commenced bucking and backing"

the nearby waters. Mann reached for his pistol and wheeled about but there was nothing to be seen. His companion twitted him for being nervous, insisting that there were no Indians in the country, yet he also cautiously gripped the cedar handle of his own faithful six-shooter.

The two men immediately extinguished the campfire and only spoke to each other in whispers.

For a while everything was quiet but tense. The silence was soon broken by an owl hoot. This was answered by another hoot across the water-hole. The mules, becoming restless, threw up their heads and snorted.

It was no longer a matter of conjecture. These observant and experienced frontiersmen knew that Indians had discovered them, and they at once prepared to give the red devils a warm reception. Lying flat on the ground, to prevent being "skylighted," the two white men faced opposite directions and breathlessly awaited further developments. This trying situation lasted about an hour. At last, Mann and his companion decided to hastily mount their mules and try to effect a get-away. Just as they leaped into the saddles, Indians rushed over the ridge, yelling like demons. It was a desperate situation for the white men, augmented by the fact that their

two mules would not budge an inch. "I spurred the old cuss," said Felix. "I quirted him and swore at him, but he was as stationary as a fence. The Indians approached within fifty feet of us, and I leveled my 'cap-and-ball' at what appeared to be a chief, determined to kill him and to fight on to the bitter end. However, just as I pulled the trigger, my mule commenced bucking and backing, not stopping until he had back-

ed off the bluff into the water-hole. My friend's mule did likewise, and there we were mixed up in a baptizing when we ought to have been leading in a horse race."

Rescued by Comrades

Mann and his comrade floundered around in the water a while before disentangling themselves from the mules. They had trouble keeping their six-shooters above the water's level. Screened by the shadow of trees along the bank and aiming their guns carefully, they shot and killed two of the foremost Indians, which caused the band to retreat temporarily. But they gave up hope when they heard hoof-beats on the opposite side of the water-hole; they thought the Indians were being reinforced and that they had been caught in a trap with no chance to escape. "I knew then how those fellows felt at the massacre of the Alamo," Felix declared. "There was a clear bright sky above us, and the north star seemed to twinkle good-bye. The hoof-beats, however, were the horses of cowboys from our own camp. These cowboys had heard that Indians were on a raid, and had come to meet us, fearful that we might be attacked."

A lively chase followed over the hills as that handful of brave cowboys drove the sneaking Comanches back beyond the borders of civilization. Some thrilling hand-to-hand encounters took place and one of the cowboys by the name of "Indian Jim" grappled with a powerful Indian buck, pulling him from his horse and killing him with the savage's own knife. He took a fine blanket and a beaded jacket from his victim, which is still a trophy in one of the fine old homes of West Texas.

Soldiers from Fort McKavett took up the Indian trail next morning, and recovered many of the best horses, which the Indians had stolen from settlers in that vicinity.

Honoring the Founders and Defenders of Texas

By BODESSA CARTER

(Copyright, 1936, by the Home Color Print Co.)

FOR many years Texas failed to properly honor some of its most distinguished citizens—not intentionally, however—for there is no man or woman who would take from the early founders of our State the honor that is justly due them.

Texans are a busy people. They have had a vast empire to reclaim, an empire that was rudimentary, that required years of laborious work and thoughtful planning to bring to its present state of progress.

But recently the thoughts of busy Texans have turned more to the men who laid the foundation of this vast empire, who came into a wilderness bringing with them practically nothing but brawn and courage and faith; it is to these men that Texans would bestow fitting honors in the form of memorials and monuments erected and to be erected to their memory.

The much-discussed Littlefield Memorial Arch, a gift of the late George W. Littlefield to the University of Texas, will soon be erected upon the University campus. It is a memorial to the Old South and the cause of Confederacy; it was the wish of Major Littlefield that it be erected at the south entrance to the campus, overlooking the State Capitol and the business section of Austin.

The memorial will consist of a fountain, surrounded by a small plaza, and the heroic, bronze statues of Robert E. Lee, Jefferson Davis, General Albert Sidney Johnston, John H. Reagan of the

Confederate States Cabinet, former Governor James Stephen Hogg, and Woodrow Wilson. These statues have been placed on display in the rotunda of the State Capitol, pending the erection of the memorial arch.

Monument to LaSalle

A monument to LaSalle was unveiled at Navasota this spring. Mrs. Paul H. Goldman of Austin, district president of the Daughters of the Republic, said that the original intention was to locate the statue in the exact spot where LaSalle was killed; however, it was decided that it would be located at Navasota instead. LaSalle, with his long, flowing hair, high boots, sabre and distinctive dress, was and is one of the most romantic figures in the history of Texas. LaSalle came to Texas long before it was a republic, and while attempting to return to the Mississippi River was killed by one of his own men.

This monument, to be erected to the memory of LaSalle, at Navasota, honors one who founded in 1685 the first white settlement in Texas, a village at Fort Saint Louis on Matagorda Bay, in Matagorda county. It was he who planted the flag of France on Texas soil.

The San Jacinto battleground is called the Mecca for Texans and for tourists. On these grounds are marked the positions of the opposing armies as they fought that 21st day of April, 1836, ninety-four years ago.

Gonzales, the Lexington of Texas and the place where the first gun of the revolution was fired, is likewise a State historical park.

Statue of Gen. Sam Houston, executed in white marble, and placed inside of main entrance to State Capitol at Austin.

Perhaps the most famous spot in Texas, known throughout the world, is the Alamo at San Antonio. The Alamo, originally one of the first missions in Texas, was turned into a fort and became the scene of one of the most heroic defenses in American history. The Alamo stands in an excellent state of preservation, a reminder of an assault in which all of its defenders, outnumbered ten to one, were killed.

At San Antonio and various other points in the State are the old missions, still beautiful despite their age and the erosion of time. Here brown-robed Franciscan fathers offered their services and lives to convert the savage Indians.

One of the latest and best statues is the equestrian figure of General Sam Houston, leader of the Texas Revolution and first President of the Republic of Texas. Mounted high upon an arched base, it commands respectful attention as it overlooks the city of Houston. The strength of General Houston's character is well brought out by the sculptor.

A monument to the heroes of the Revolution, at Gonzales, is a symbol of the thirty-two citizens of that city who died in defense of the Alamo. The spirit of those who fought in the Alamo is carried out in the statue. It is the figure of a pioneer Texan—a fighting figure—with gun over left shoulder and a look unconquerable written in every line of the face.

Statues of Stephen Austin and Sam Houston

Austin boasts of two statues of fa-

mous men in Texas history—Stephen F. Austin, the father of his State and founder of the first Anglo colony in Texas, and Sam Houston, pioneer soldier and Statesman. These statues, famous works of Elisabet Ney, are executed in white marble, and are located inside of the main entrance to the State Capitol at either side of the center arch that leads to an immense rotunda.

Austin, small in stature but big in the affairs of his State, dressed in a buckskin jacket trimmed in fringe, holds a map of Texas before him. Houston, brawny, virile and of a decidedly superior physique, stands erect, his left hand touching the hilt of his sword.

A striking statue in Austin is the "Cowboy Statue," that honors a fast disappearing type of western trail-blazers. It is a tribute to the men who rode fearlessly the range in an epochal and adventuresome era.

Other monuments that commemorate our heroic dead are: A winged statue, mounted on great slabs of native rock, in memory of the Confederacy, at Houston; monument of Patriotism in Honor of Heroes of the Texas Revolution, at Galveston; monuments honoring the defenders of the Alamo, at Gonzales; the San Jose Mission, world famous for its artistic window, at San Antonio; Sam Houston's home, a plain, one-story, wooden structure, at Huntsville.

Texas may sometimes overlook but does not forget her past distinguished and honorable citizens, founders, defenders and builders of one of the greatest States in the Union of States.

Fix Temperatures of Other Planets

NO other units of the solar system are there such mild variations of temperature as exist on the earth to make human life possible. Temperature measurements of the moon and the planets, reported to the National Academy of Sciences at a meeting held recently in Pasadena, Cal., by Drs. Edison Pettit and Seth B. Nicholson of the Mount Wilson Observatory, show intense heats or killing colds.

Using an electrical heat measuring device, called a thermocouple, placed in the principal focus of the 100-inch telescope on Mount Wilson, the two astronomers recorded the heat coming from various portions of the moon and the planets at various times of the year. After allowing for the sunlight reflected by the planet and the heat absorbed by the earth's atmosphere, it was possible to compute the surface temperatures on other planets.

When the sun strikes, the moon's

temperature is 216 degrees Fahrenheit; away from the sun, it is 243 degrees below zero.

Mercury, closest to the sun, has a maximum temperature of 720 degrees. Venus is covered by high clouds and the telescope can not penetrate to its surface, but the measured night temperature was found to be about 23 degrees below zero.

Temperature Variance on Mars

The temperature on Mars varies greatly, not only with day but with the season. When the sun is at high noon and the planet is nearest the sun the temperature is 72 degrees. When the planet is furthest from the sun the noon temperature is about 40 degrees below zero.

The other planets are very cold, as is to be expected on account of their great distance from the sun. The average temperature of Jupiter is 216 degrees below zero.

The nebulae, great stellar galaxies

like the milky way that exists far out into space, can be used as milestones for the measurement of the universe. Dr. Edwin Hubble of the Mount Wilson Observatory reported to the National Academy. He presented evidence that the reddening of light from these distant nebulae which indicates that they are rushing away from earth at immense speeds, can be used to measure their distances.

Astronomers are now confident that they are photographing with the great telescope on Mount Wilson gigantic masses of stars whose light takes 200,000,000 years to reach the earth. It required about sixty hours of observing by Dr. Milton Humanson of the Mount Wilson staff to take the spectrum of a distant nebula.

Using thirty-four of these spectra, Dr. Hubble said, he was able to calibrate from the reddening of the stellar light that a nebula at a distance of 75,000,000 light years was moving away at a speed of 6,800 miles a second.

Early American Relics Told Of

Evidence as to the antiquity of man in North America was presented to the National Academy of Sciences by Dr. Chester Stock of the California Institute of Technology from findings in Gypsum Cave at Las Vegas, Nevada.

In this dry cave, Dr. Stock and M. R. Harrington of the Southwest Museum of Los Angeles, found bones, dried flesh, claws and other relics of the prehistoric ground sloth called *Glossotherium*. Among the sloth remains and in the earth laid down at the time the sloths lived were human traces. In one layer, charcoal and a carved stick were found. In another place an atlatl or stone point of a throwing stick of unique crude workmanship was found close to bones of sloths, extinct horses, camels and other animals. Above these layers of earth are the debris of later Indian races who also found shelter in the cave.

Scientists have believed that the sloths were extinct hundreds of thou-

sands of years ago.

Dr. Stock will undertake more research in the Nevada cave in about a month. The remains of plants found in the earth layers will be studied.

HORSE 42 YEARS OLD STILL WORKS

George Lucas, of Fort Worth, owns what is probably the oldest horse in the State. He has an English type of surrey horse that is 42 years old, and was imported into this country by a banker in 1893.

In spite of his advanced age the horse is still active and hearty, and performs some light service for his owner nearly every day, pulling a light dray wagon.

REPUBLIC OF TEXAS NOTE

John A. Burrows, of Colorado, has informed officials of Texas that he has a ten-dollar Republic of Texas note, issued in 1837 and due in 1838, to draw ten per cent until paid. Mr. Burrows says the note has never been paid.

CURRENT COMMENT

By J. H. (JIM) LOWRY
(Copyright, 1930, by the Home Color Print Co.)

November

NOVEMBER was the ninth month in the old Roman calendar. Let us thank our stars that a real statesman appeared and moved it to eleventh place. If November were now in the place occupied by September, Thanksgiving Day would come in the warm season, before the turkeys get fat, before cranberries are ripe, and before oysters are fit to eat; and such another mess as that would be. Don't recall the name of the statesman who pushed this reform through, but he was a statesman of the first water. Instead of making the race on his "wet" or "dry" record, or upon a threat to grab the trusts by the nape of the neck and the looseness of the pants and throw them into the sea, he announced a real constructive platform and told the people that November must be pushed backward into cold weather or every turkey-raiser, and every cranberry-grower and every oyster-dealer would be forced into bankruptcy. Oh, that we had such a constructive, such a courageous statesman now. I'd vote for him regardless of his attitude toward the Volstead law, or whether he did or did not support the Democratic ticket two years ago. Yes, I'd be for him even though he sponsored a twenty-million-dollar-bond issue, in order to make a change and put things in their proper place and season.

November will be very rich in odors. The yards and gardens will be redolent of the breath of the late fall roses and the lovely chrysanthemums. The forests will be perfumed with the delightful odors of the wild grapes, the golden persimmons and the wild haws, while from every pantry and kitchen will come the pleasing aroma of sausages and spareribs sputtering and browning in the pan. All these will delight the olfactory and make us glad inside and out, but, sad to say, there's another odor poor man must endure. The lights of prosperity haven't glittered much recently, and instead of a new suit and overcoat, most of us must catch the smell of camphorated duds that were packed away in moth halls last spring.

There is more gray than gold in the world these November days, for the fires of summer have burned out and the cold of winter creeps closer and closer with its chilling winds. But this is a season, which forms a delightful resting place between summer and winter—the hazy time that we call Indian summer—is the most delightful of all the year. The bracing air is a tonic for the blood; the subdued sunshine, which brightens and warms but does not excite or dull, is a builder of energies and a painter of pictures that touch into life the nobler sentiments of men and women. There is not in the

world about us the lusty life seen in field and garden when summer sent its shimmering rays down on the tasseling corn and ripening meadow, neither is there the naked tree and barren hillside which follow the long lashings of Boreal winds, but there is a merging of the glories of the gold with the sad beauties of the gray. It is a glory that is soon to pass away, and perhaps we love it more because the ever-drifting leaves, the withering flowers and the northern blasts have sounded the alarm in our hearts that soon this splendor, like man, must fade as the grass.

One of the most harrassing things in the world is to go into a store, call the proprietor to one side, and in whispered tones ask him to credit you a week or two for a few things, and then have him refuse you credit in a voice so loud that every fellow around the stove and in front of the store can hear every word he says.

Don't know why its so, but it's a fact that homely girls who come to visit in the town are far more popular with mothers who have marriageable daughters than the pretty ones. Let a girl who has a twisted mouth, is slightly cross-eyed, and whose lower limbs are too fat and unsymmetrical come visiting in the community and the mothers with marriageable daughters say she is a sensible woman and remarkably sweet. But if the visitor should have the complexion of a ripening peach, soulful eyes and legs as symmetrical as a baseball bat, the mothers will declare her a lazy, pert little flirt that every boy should stay away from.

Speaking of hard luck and the denial of life's sweetest pleasures to which one is justly entitled, it seems to me that the poor Illinois woman of whom we tell has greater cause for complaint than any person of whom we have heard. Her son-in-law, who made his home with her several years, was hanged recently. She tried every possible scheme to gain admittance to the jail yard when the hanging took place, but the hard-hearted officers would not permit her to witness the hanging. It would not be a more cruel punishment if a healthy, strong child should be made stay in bed all Christmas day.

No man liveth unto himself, neither does any man labor alone. If you grow a beautiful flower, build a pretty house or keep a pretty lawn, you build within others a love for the beautiful and inspire others to higher and nobler efforts. If you live a beautiful life, your life will give the touch of inspiration that will beautify and ennoble other lives. If you smile, a neighbor rejoices and loses his frown. If you give to the world a labor of love, the beauty of that labor erases a line of selfishness from a

neighbor's breast. If you sing a song of gladness, the cadence thereof falls upon another heart and awakens it to ecstasy. If you stand like a lion against wrong, the arm of another is nerved for the conflict in the name of righteousness.

Recent statistics show that about ten times as much snuff is now made and sold in the United States as was used half a century ago. It is claimed that figures do not lie, but I hesitate to accept the figures given out by the government concerning snuff. I know that snuff caused me a great deal more trouble fifty years ago than it does now. Much time I lost then from fishing and play searching the woods for snuff-mops for mother and her guests, and occasionally I climbed a tall blackgum tree to find an acceptable mop for a radiant maiden. What little snuff I see consumed now is not applied with a mop. The users, who are not of the feminine gender, park the powder between their molars and their lower lips.

Some visits we all naturally forget, but I am sure I will never forget my visit to my rich uncle back in one of the old States about the time I was grown. Having heard that my uncle was very wealthy, I was very anxious to see him, and saved up my Christmas and picnic money to make the trip. I had heard that he lived at one of the larger towns in Mississippi, but when I reached the town I found he was making a share-crop on a farm four miles from town. A fellow who lived in the same neighborhood agreed for me to ride out on his wagon. On the way out I asked the owner of the wagon if my uncle wasn't "well-fixed." "Oh yes, he's very well fixed," the fellow replied. "About how much do you think he's worth?" I asked. "I hardly know, but he's mighty well-fixed," said the man. "He has two good mules and a wagon, a good cow and calf, four good meat hogs and a sow that will bring pigs in a week or two. He must be worth something like six or seven hundred dollars." And he was.

Another inequality I have noted is in the size of families and the ownership of automobiles. Parents that own a long seven-passenger car, with as much room as is found in the average library, occasionally have one child to take riding, but usually there is not even one. But let a Ford touring car of ancient vintage come along and seven children are crowded inside while two ride in the luggage racks. The stork is certainly partial to the open-top Fords.

Efforts to stabilize the price of cotton have been so unsuccessful that people are saying it can't be done. But it can. If the price of one commodity can be fixed and kept at the same figure, the price of all commodities can be stabilized. And the price of chewing gum

has been five cents a package for fifty years, and the price of Garrett's snuff has been thirty-five cents a bottle since the foundations of the world were laid.

I have looked the new winter dresses over and find that they are much longer than before. I have also examined the price tags and looked over my bills, and find that the price of skirts is higher than before. This means that man will pay more and see less. Well, "man was made to mourn," and the modistes will see to it that he is not without cause for mourning.

An ingenious fellow up in Ohio has applied for a patent on an electrically-lighted keyhole. I look upon this as another move of the whisky interests. Sober men do not need electrically-lighted keyholes, but the whisky ring know that if something is not done to help drunk men find keyholes, they will quit getting drunk and turn to buttermilk. After a fellow has spent an hour or two trying to find the keyhole of his front door in the flower pot or on the off side of a porch column, is a fine time to solicit him to sign the pledge and join the Buttermilk Club.

Is a mule kick an accident? This is a question the courts of an eastern State must decide. A man who carried an accident policy with an insurance company was kicked by a mule and died of his injuries. His beneficiaries attempted to collect the amount named in the policy, but the insurance company resisted payment on the grounds that a mule-kick is not an accident. In passing upon the case the court will have to consider both the kicker and the kickee; did the mule deliver the kick accidentally, and did the man get kicked accidentally. So far as the mule was concerned, I must say that the kick was not accidental; no mule ever kicked a man accidentally. Mules do not do business that way. As to the man, if a cyclone blew him against the rear end of the mule, it was an accidental blow he received, but if he voluntarily placed himself within range of the mule's heel, it was a clear case of suicide.

Unhappy the man whose imagination runs riot and leads him to construe everything as a slur at himself. Not long since a man who was earning a good living and having a fairly good time reached the conclusion that the pictures in the funny papers were drawn to ridicule him, and he straightway committed suicide. It's well to take a hint when it comes, but disastrous to go on dress parade in search of a hint.

Some modern inventions are time-savers, while others are great wasters of time. In the latter class is the butter-knife. In the good old days before the crooked handle butter-knife came into use, every diner had his own butter-

knife, but in these degenerate days there is but one butter-knife on the table, and all diners, male and female, old and young, must use it. In the good old days I have seen three or four people cutting butter at the same time, each carving on the side next to him or her. Now only one person can cut butter at a time, and the diners lose a world of time awaiting their turn at the butter-knife and the butter ball.

I am not a pessimistic wailer, and am not saying that times are hard in my neck of the woods. But if it is true that one extreme always follows another, and the pendulum swings as far out as it did in the opposite direction, then I am sure that when the change does come we will have to have our greenback baled in hay presses in order to handle it more conveniently and that our tammies will be wrapped in dollar bills.

This November weather is glorious. There is a tang in the air that revitalizes the system. There is beauty and glory in the forests and the fields. But I can not enjoy it. I never could enjoy a vacation much, for counting the hours until work time would come again. Neither can I enjoy the glories of the November season, when Nature's artist turns the green of the leaves into flaming crimson; and it's all because November brings us so close to something else. Well I know that some quiet evening when man, rejoicing in the victories of the day and breathing good will toward all mankind, seeks the quiet of his restful home to restore his strength, will sit down, and suddenly will feel a pain. He'll rub his head, but the pain is not there. He will poultice his chest, but there are other places that hurt worse. He will grasp his abdomen, he will bathe his feet, he will place hot lotions on his spine and glue flannels to his side—but all efforts to locate the pain will be as futile as a picnic girl's chase after a summer flea. That pain is both fixed and moveable. In one short hour the victim is turned from a model citizen into a raving demon. He cuffs the cat, curses his wife, swears he will vote the Socialist ticket, and goes to bed with his pants on. It's the flu.

In the Fiji Islands thieves are never sent to jail; their hands are cut off so they can't steal any more. A thief doesn't produce anything, so why pay a policeman to watch him and thus add another man to the non-productive class? Furthermore, when you send a thief to jail, you must pay taxes to support him. The Fiji Islanders give a thief a chance to be good after his hands are cut off; if he isn't good then, they decapitate him. They have no policemen to pay or prisoners to support. Study the plan of the Fiji Islanders a little and then say whether we have very much on them in the matter of dealing with criminals.

"The Sear and Yellow Leaf"

By JOE SAPPINGTON

(Copyright, 1930, by the Home Color Print Co.)

WHEN a fellow starts talking of the good old days of the past and finding fault with all things modern, it's a never-failing sign that he's entering the "sear and yellow leaf" period of life. Most moral crusades are started by men in their late fifties. No matter if he were a rounder and regular he-devil when a young man, it is no sign he won't be a tiresome bore against everything joyful and beautiful, from short skirts to Sunday baseball, when he grows old and grouchy. As a young buck he probably was fond of dancing and was not above stealing old Beck, the family mule, while his folks slept and going under whip and spur to a country dance over in an adjoining county. But after the hair falls from his head and rheumatism settles in his joints that makes him walk like an aged gander, he can see nothing but evil in the ball room or anything else that an old man can't take part in. The average old codger can't understand why his boy doesn't cut out all his had habits overnight, that took thirty long years for his daddy to quit. Yet the greatest of all mysteries to him, is why this same boy will lose his appetite and talk in his sleep about a silly gum-chewing girl. He forgets the time he moped around like a hen with an egg busted in her while courting the boy's mother some twenty years before.

Wonderful Things of the Past

The temptation to boast of the wonderful things of the past are many and

insistent with most old men. No matter what has taken place in recent years—let it be a cold winter, flood, drought, cyclone—no matter what, the fellow who took part in Grover Cleveland's first election can remember things by far bigger, better and more disastrous that took place in the latter part of the last century.

"Nature has formed a great bath tub in an everlasting rock"

Most men getting along in years will unconsciously exaggerate the things they saw and took part in when they were boys. I never realized what a notorious liar I am or was until last summer while passing through the community where I spent my boyhood days. There were four of us friends in the auto and I was the oldest of the four. "Gentlemen," I began, waving my hand to the northward, "not more than a half mile from here is the finest pool of water in the entire South. Really and truly nature has formed a great bath tub in an everlasting rock, the bottom of which has never yet been found. I myself have dived fifty feet from one of its overhanging cliffs into the limpid depths and—"

"Sap, you say it's only a few hundred yards to that hole of water; suppose we all go and look at it," suggested one of my listeners.

Disillusion of Youth

Thinking probably I had made the depth of the water and the height of its overhanging cliffs a little bigger than the facts might justify, I tried to discourage a personal investigation on their part by stating that the place was hard to get to, even on foot, and that it had been more than forty years since

I had been there and was not sure I could find it, besides I had a bad cold and was afraid of getting too warm. But all my objections were overruled and at last we started in search of that wonderful pool. I purposely led them a round-about way through brush, briar and rocks, thinking they would finally become disgusted, give up trying to find the pool and go back to the auto. But just at this juncture we met a man and one of our crowd asked him to direct us to that bottomless pool of water surrounded by mighty cliffs of solid rock. "If you mean the old swimming hole, it's right over there not more'n two hundred yads from here."

I knew all the time where it was and marched straight to it.

That bottomless pool was filled with mud, covered with a green scum of water and that mighty cliff from which I had so recklessly dived head long had shrunk to a height of about seven feet.

"Of all the liars I have ever seen or heard tell of you take the cake," said the oldest of the three friends as we started back. That was the only remark made until we had reached the auto when the driver asked if he should drive by the place where I had that combat with a panther.

"Hell, no!" they all yelled in one voice.

Lecturing and Advising Son

There is not one of those men today who does not think that I deliberately lied about that pool of water. I was trying to tell it as I remembered it when but a mere boy.

Another obsession of old age is the growing desire to caution and advise wayward youth. Realizing that I was getting along in years and had been neglecting my duties as a fault-finder and admonisher of the young, I decided a few weeks ago to get busy at once and started to work on our son. The opportunity came one night when he

was rather late coming home from a picture show.

"Son," I began when he came into the room, "when I was your age I made it a point to be in bed every night by nine o'clock, except on church and prayer meeting nights. I was a model boy, truthful, upright and the very soul of honor and was never so happy as when doing kind and generous deeds. I trust, son, you will respect my wishes after this and not cause me further anxiety."

"Say dad," he began as I was leaving his room, "I want to ask you something. How come you to quit so many of your good habits after you and mother married?"

"Why do you ask such a foolish question," I replied.

"Oh, nothing much. I just happened to remember a quarrel you and mother had a long time ago and among many other things she reminded you of the time you went to a Dutch dance and didn't get back until almost daylight and was so lit up that you couldn't find the door and skinned your shins trying to climb the chimney; and she didn't stop at that, either, but proceeded to tell of the time you paid a fine for playing poker and in the same conversation or quarrel dared you to deny that you lost the milk cow grandmother gave her betting with a Republican that W. J. Bryan would be elected President, and that other time—"

"You have said about all I care to hear tonight, young man. The thing you heard your mother say were silly jokes and you must not repeat them again."

"All right, dad, I'll call mother in right now and see what she has to say about them being jokes."

"Never mind about bringing your mother into this. You go on to bed and don't let me catch you getting in home at this time of night again."

All of which goes to show what little

respect children of this day and time have for their parents.

RAILROADED SIXTY-ONE YEARS

E. L. Haddix, of Waco, who recently retired as conductor on the Cotton Belt railway, was an active railway worker for sixty-one years.

Mr. Haddix was born in Indiana in 1848, and began his railroad career in 1869. When he retired he had been a railroader sixty-one years. Before entering the railway service he was employed as a freighter, driving a wagon to which was attached six yoke of oxen from Junction City, Kansas, to Galveston. His first railway service was as brakeman with the Kansas City, St. Joe & Council Bluffs Railway. He was advanced to the position of conductor in due time, and in this capacity he served the Union Pacific before coming to the Cotton Belt forty years ago.

In the forty years that he served the Cotton Belt as conductor, Mr. Haddix scored a perfect record. The road was never called on to pay one cent by reason of carelessness or negligence on his part.

MEXICAN WOMAN 140

Mrs. Laura Lara, of Rio Grande City, Texas, claims to be 140 years old. The venerable woman has no birth certificate, since the record of the churches of Northern Mexico were destroyed during the revolution, but her recollection of past events and the testimony of her relatives seem to leave no doubt that she is as old as claimed.

Mrs. Lara was a grandmother when General Robert E. Lee, then in the United States army, was at Fort Ringold during the war with Mexico in 1848. She was 58 years old then, she says, and had several grand children.

Mrs. Lara says she remembers General Lee well, and was his laundress while he was at Fort Ringold.

NEW BRIDGE FOR RED RIVER

The contract has been let for the erection of a bridge across Red River on Highway No. 51, near Quanah. This will be a free bridge.

HEAVY FIRE LOSSES FROM ARSON

Incendiarism in Texas during the month of August caused a loss of \$121,468. There were thirty-seven fires of incendiary origin. The total fire loss during the month was \$1,200,919.

FEDERAL BUILDING FOR MEXIA

Bids have been advertised for the construction of a postoffice building at Mexia. The site selected for the structure is near the city hall. The building is to cost about \$100,000.

NEW LIBRARY FOR SUL ROSS COLLEGE

Sul Ross Teachers College, at Alpine, has a beautiful new library building, which was ready for the beginning of the present session of the school. The new structure cost \$150,000, and was dedicated with appropriate ceremonies.

FOURTEEN-STORY COURTHOUSE FOR BEAUMONT

Work is now in progress on the new Jefferson county courthouse at Beaumont. This new structure will be in the form of an office building and will be fourteen stories high. The building will cost, including electrical work and plumbing, \$762,162.

KILLED A BUFFALO WHEN EIGHT YEARS OLD

J. H. Powell, aged 84, an old Indian fighter and buffalo hunter, died at San Marcos a few weeks ago. Mr. Powell participated in many Indian fights on the frontier. When a lad only eight years old he shot and killed his first buffalo on the plains of West Texas.

FARMER RAISED 6,000 BALES OF COTTON

One of the large growers of cotton in Texas is George G. Chance, of Brazos county. Mr. Chance's cotton lands are in the Brazos bottom. This year Mr. Chance had a little more than 6,000 acres in cotton, and his crop yielded an average of a bale per acre.

PRISON FARM HAD BIG COTTON CROP

The State of Texas produced this year nearly 12,000 bales of cotton on the prison farms, compared with 3,000 bales last year. This is one of the best crops the State has ever made on the prison farms, and if prices were good the crop would more than pay operating expenses.

LAND BOUGHT FOR HOSPITAL

The Federal government has purchased a tract of 512 acres of land a short distance south of Waco, on which the Veterans' Hospital will be erected. The price paid for the land was \$157.50 per acre. The initial appropriation made by Congress for the erection of the Veterans' Hospital was \$1,200,000.

\$500,000 REFINERY FOR TEMPLE

A \$500,000 petroleum refinery is to be erected at Temple by the Texas Pacific Coal and Oil Company, of Fort Worth. Several hundred men are to be employed in the construction of the refinery, and a pay roll of \$7,000 monthly will be maintained. The refinery will have a capacity of 2,000 barrels daily.

HAT FACTORY AT LAREDO

Work is now in progress on a \$30,000 factory building for the Texas Harvest Hat Company of Laredo.

This prominent enterprise of the border city has over 300 employees on the pay roll, and when the new building is completed the number of employees will be increased. The number of Harvest hats manufactured annually has been 1,500,000, but with larger quarters the output will be increased to 3,000,000.

The company also owns factories in Dallas and St. Louis.

WOMEN TO WEAR MORE COTTON, LESS SILK

A few weeks since the club women of Van Zandt county organized a home demonstration council. One of the first important steps taken by the council was the agreement to buy less silk and wear more cotton. Organization was perfected under the auspices of the county home demonstration agent. More than 100 club women of the county became members.

HOUSTON NOW 24TH AMERICAN CITY

The corrected census reports give the city of Houston a population of 291,282. Houston now ranks twenty-fourth among American cities in population. Cities ahead of Houston, in the order named, are: New York, Chicago, Philadelphia, Detroit, Los Angeles, Cleveland, St. Louis, Baltimore, Boston, Pittsburgh, San Francisco, Milwaukee, Washington, New Orleans, Cincinnati, Newark, Kansas City, Seattle, Indianapolis, Rochester, Jersey City, Louisville and Portland.

BABY BORN WITH TEETH

A few weeks ago a daughter was born unto Mr. and Mrs. Minters, of San Antonio, who had two teeth at the time of her birth. Both of the teeth are uppers, and four others had cut nearly through the gums of the lower jaw.

MANY DEATHS FROM FIRE

Fire caused the death of 359 persons in Texas during 1929 and a property loss of more than \$20,000,000. In the United States fire caused the death of more than 10,000 people during 1929. Thirty-one per cent of the deaths attributed to fire were under 10 years old.

DAVY CROCKETT'S KNIFE STOLEN

News came from Chicago a few weeks ago that the Davy Crockett Bowie knife had been stolen from the Chicago Historical Museum. The knife which was once owned by the hero of the Alamo was on display in the show cases of the historical society. The knife was eight inches long and was carried for several years by the bold frontiersman who played such an important role in gaining independence for Texas.

At the same time the Crockett knife was stolen, a pistol which had belonged to General U. S. Grant was taken.

OLD BRIDGE DESTROYED

A news note from San Angelo says a bit of West Texas history is to pass with the destruction of the Oakes Street bridge across the North Concho river. The bridge is to be destroyed to make way for a new \$90,000 structure.

The old bridge was the first ever constructed across any of the four Concho rivers. The contract for its construction was let in July, 1886. When completed it was tested by having 50,000 pounds of government property from old Fort Concho hauled upon it. The bridge was in service forty-four years without a serious accident.

OLD RAILWAY ENGINE IN MUSEUM

What is left of the railway engine known as "Nellie Bly" was recently placed in the Witte Memorial Museum in San Antonio.

This pioneer Texas engine pulled trains into Austin more than half a century ago. When put into service the engine was the property of a weak, unpretentious railway company known as the H. & T. C., which was later merged into the great Southern Pacific system. Later the engine was transferred to other divisions of the road. It is said that she pulled hides to the tanneries on the coast when the hides were worth more than the carcasses from which they were taken. The engine's last service was on the Fredericksburg & Northern line, a road eighteen miles long, on which "Nellie" was the only engine.

A NOTED PECAN TREE

Perhaps the most noted and valuable pecan tree in the eastern division of the State of Texas is one which stands in the heart of the pine belt in Newton county.

This is believed to be the oldest pecan tree in Eastern Texas. It was planted in 1849—eighty-one years ago—by a Mrs. Steele in the back yard of what was then her home. It is said that from this one tree alone 200,000 other pecan trees have been grown. A writer in a Beaumont paper gives the following information concerning this wonderful tree: "W. C. Lenahan owns the farm on which the old tree stands in the northern end of Newton county, near Toledo. Measurements show the tree to be a gigantic thing with a circumference of 22 feet, four inches, one foot above the ground. The average spread of the limbs is 142 feet.

"Never once that anyone can remember has the tree failed to bear a crop yearly. It seldom produces less than 500 pounds of nuts and has been known to bear well over 1,000 pounds during a single year.

Nuts from this tree have been used by a nurseryman of Jasper in the growing of stock to which grafting is later done. The result is a fine grade paper shell pecan which is much in demand everywhere."

TEXAS CROPS VALUED AT \$460,000,000

Despite low prices, droughts and general agricultural depression, Texas crops of 1930 have an approximate value of \$460,000,000, based on Federal government figures and prices that obtained about October 1. This estimate does not include the approximate value of mohair, wool, live stock, dairy products, poultry, eggs, pecans, and some minor crops. Should these be added, the total value would be around \$710,000,000. This is a splendid showing, when unfavorable seasons and depressed agricultural conditions are considered.

The Texas corn crop is estimated at 83,232,000 bushels. Grain sorghums are estimated at 40,530,000 bushels, six million bushels below the crop of last year. Oats show a substantial gain with 53,157,000 bushels, compared with 40,096,000 bushels last year. Rice shows a gain of 900,000 bushels over last year. Tame and wild hay shows a drop from last year of about 300,000 tons. There is a considerable gain in the peanut yield over last year's crop.

Truck crops show a considerable gain, and so do citrus fruits, which are estimated at 5,000 cars, against 4,000 last year.

A PIONEER EDUCATIONAL INSTITUTION

One of the early and most noted educational institutions of Northeast Texas was McKenzie Institute, near Clarksville, Red River county.

This institution of learning was founded by Rev. John Witherspoon McKenzie, in 1841.

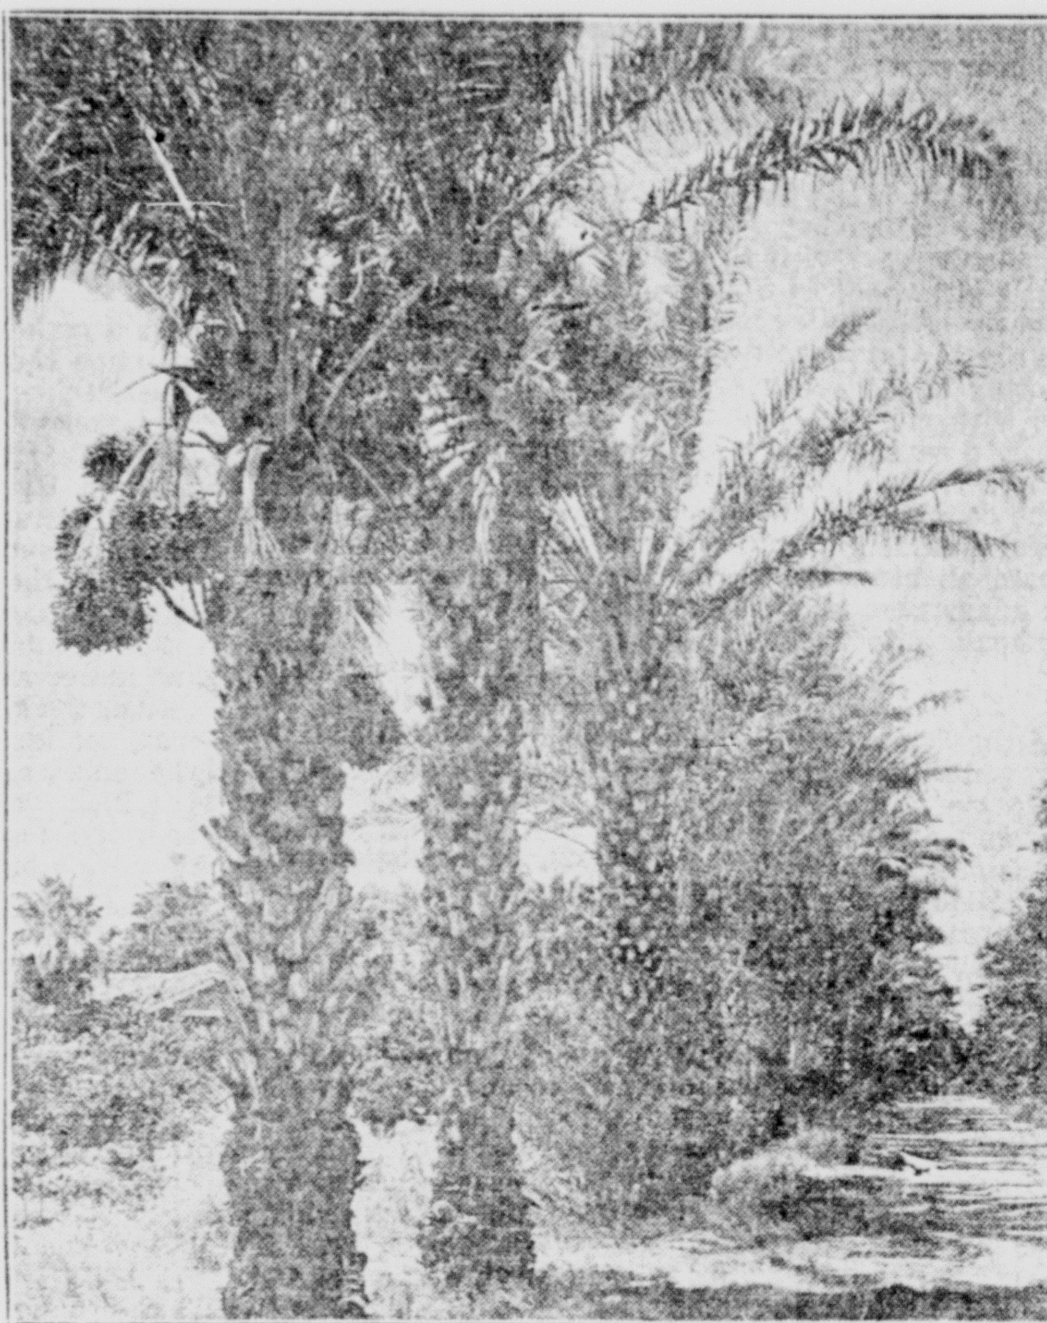

The founder and only owner of the school was born in North Carolina in 1806 and was educated at the University of Georgia. Early in life Mr. McKenzie became a member of the Methodist church and was licensed to preach. In 1836 he was sent as a missionary to the Indians in what was then the Indian Territory. Three years later he accepted a large circuit from a Conference in Northeast Texas. His health failing so that he was unable to continue his work as a circuit rider, he settled on a farm near Clarksville. He soon opened his first school, which was housed in a log cabin and attended by sixteen pupils. The school was continued for twenty-five years, buildings being added as needed, and the enrollment finally reached 405. Students came from all sections of Texas and from Arkansas, Louisiana and the Indian Territory.

Like many Southern institutions, McKenzie Institute was broken up by the war in 1860. Some of the buildings were burned during the war, but one of them still stands and is used as barn by a son of Rev. Mr. McKenzie, who owns and lives on the farm to which his father moved in 1841. The library of "Father McKenzie," as he was known to his students, is also still in possession of his son.

A Beautiful Spot Where Dates Grow and Ripen

The picture accompanying this shows one of the real beauty spots of Texas and the world. It is a scene from Rancho de Palma, in Dimmitt county, Texas, about four miles from the pretty town of Carrizo Springs. This beautiful ranch looks out upon the old Presidio Trail, along which Santa Anna and his army traveled to Goliad in 1835.

The trees which line the avenue leading from the historic trail to the ranch house are stately date palms. These trees are not merely ornamental, as are the palms seen in some other sections, but productive as well as ornamental. Possibly Joyce Kilmer had one of these trees in mind when he declared that he would never see "a poem lovely as a tree." But there is more than strength of body and beauty of foliage to

Date-bearing trees along "Palm Drive," near Carrizo Springs, Texas.

the trees seen in this picture—they bear fruit. Date trees are grown in many places for ornamental purposes, though give to the world no fruit. But under the kisses of the Winter Garden sun in Dimmitt county the dates assume form and color and come to glorious maturity. The date palm is a native of Africa and Southwest Asia; its introduction into the United States is comparatively recent. A bunch of dates, such as is seen on the trees in the above picture, weighs about twenty-five pounds, and the average crop from a tree is around 600 pounds. The tree begins bearing about the eighth year and comes into full bearing when about thirty years old.

The trees seen in the picture were put out by a young Swede in 1910. There are now growing on Rancho de la Palma fifty-four varieties of fruit and nut-bearing trees, and about fourteen that will bear next year.

BIG IRRIGATION AND POWER PROJECT

Work is in progress on the construction of the main canal of the big irrigation and power project on the Rio Grande at Eagle Pass. About \$6,500,000 is to be expended on this project for the irrigation of 60,000 acres of land and the development of water power. The main canal will be more than ninety miles long.

MOTION PICTURES FOR DALLAS SCHOOLS

Stereographs, in which lantern slides will be used, are to be placed in the grade schools of Dallas, with regular film projection machines being placed in the schools which have an auditorium available for the showing of pictures.

Correlation of geography and history in the sixth and seventh grades of the elementary schools will be the first step in the introducing of visual education in the schools. The subjects will be correlated by the teacher, keeping as far as possible from the idea of making a motion picture theater out of the class room.

The thrilling ride of Paul Revere, the landing of the Pilgrims, the Dutch Colony in the region of what is now New York, the Boston Tea Party and the Fall of Quebec are a few of the incidents of United States history which will be told in stories and in pictures. The United States government furnishes for educational purposes slides of industries, such as mining, lumber, agriculture and various occupations.

TRINITY CANAL ASSOCIATION CHARTERED

Articles of incorporation have been granted by the State of Texas to the Trinity River Canal Association, which was listed by the Secretary of State as an incorporation for the improvement of waterways.

Of the forty-eight directors listed as incorporators, twenty-one reside in Fort Worth, seventeen in Dallas and ten in other towns of the State.

The main object of the association is the canalization of the Trinity River, looking toward navigation of the stream, and the building of dams and reservoirs to assist in the work of flood control.

SOURCES OF STATE'S REVENUE

The ad valorem taxes on property now provide the State of Texas about 33.6 per cent of the revenue derived from taxation. Special taxes, chiefly franchise taxes on corporations, and gross receipts taxes, provide about 16.4 per cent. These two forms of taxation provide about 50 per cent of the revenue derived by the State from taxation.

DREAM OF RAILROAD BUILDER NEARS REALIZATION

Nearly forty years ago Arthur Stillwell, of Kansas City, dreamed of a great railroad running from the heart of the American midland to the western coast of Mexico. Mr. Stillwell fought what seemed a losing fight and then passed to his reward, but today his dream nears realization.

Mr. Stillwell started the road, which was known as the Orient, and it reached San Angelo in 1907. Some years later it was extended to Alpine, and for years Wichita, Kansas, and Alpine were its terminals. Many financial troubles were encountered, and for quite a time it seemed that the line might be abandoned, but it was saved, no doubt, by the discovery of oil west of San Angelo, which gave a mighty stimulus to the road's business.

Last year the line was sold to the Santa Fe system, and further construction was immediately taken up. Trains are now being operated into Presidio, and from the border to the center of Mexico. That the line will some day touch the western coast of Mexico now seems assured.

DAIRY FACTS

By J. W. RIDGWAY,
Manager, Mistletoe Creameries, Inc.
Fort Worth, Texas

Economical dairying is sound because the cash returns are constant and regular. The dairy cow produces human food more economically than does any other farm animal. As compared with the beef steer she will take a dollar's worth of hay or grain and convert it into six times as much digestible human food as will the steer.

Dairying has been responsible for the rebuilding of worn-out soils, and as time goes on and the natural fertility of the soil becomes exhausted the dairy cow is a big factor in the rebuilding of this soil fertility.

There of course will be many problems that the industry will meet, and thoughtful well directed leadership is needed to insure its permanent stabilization. Without posing as a dispenser of a panacea for all of the evils that will confront this industry, I would briefly summarize the following essentials of a successful dairy program.

First, a gradual growth into dairying rather than a sudden and large investment in cattle and equipment.

Second, the raising of the standard of the production of dairy cows in the State by selective breeding, based on the more general use of purebred sires.

Third, the production of more home-grown feeds, with especial reference to pastures and legumes, in order that more liberal feeding can be practiced.

Fourth, the improvement of the quality of dairy products so as to stimulate consumption and increase profits.

The first of the above mentioned essentials is particularly applicable to our Texas conditions. The average Texan is by inheritance and environment "beef minded" as relating to the handling of cattle. The dairy cow requires more care and attention

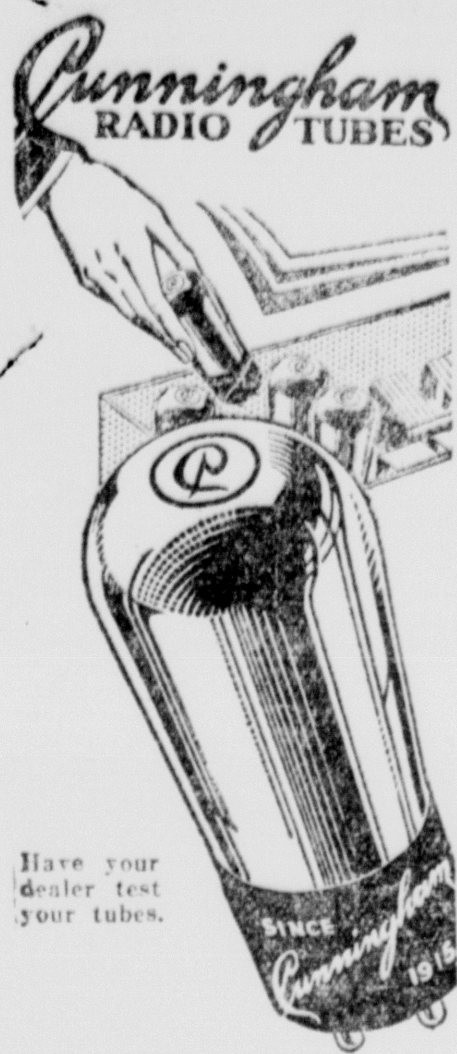

than ordinary stock or beef cattle. Better housing facilities are essential, as the dairy cow because of her production of milk is always thin in flesh and cannot resist the extreme changes of temperature which we have in certain sections of the State.

If we accept statistics from the U. S. Department of Agriculture, and this is our most reliable source of information, we are astounded to find that the average production of the dairy cow in the State of Texas is below 100 pounds of butterfat in a year. This low production can be accounted for in two ways, improper and inadequate feeding being one of the causes, the principal one however, being the inherited low productivity of the average cow. So far as feeding is concerned, this can be immediately overcome by a more liberal provision of home-grown feeds, with especial reference to an abundance of pastureage. In many sections of the State some form of green pastureage is available throughout ten months of the year, and this affords the cheapest source of dairy feeds.

Your county agent or Agricultural College can outline to you a system of crops that will insure an abundance of grazing for more than three-fourths of the time. With a little thought and care it is possible to raise an abundance of forage and feed crops. The dairy cow is so constituted as to be able to consume large quantities of rough feeds to an advantage. This particular phase of improvement can be accomplished within a short period of time, and is really one of the important features of successful dairying.

(Any subscriber of this newspaper who has a question to ask about his dairy cattle should write to Mr. J. W. Ridgway and he will be glad to answer it free of cost. Address Box 1012, Fort Worth, Texas.)

A LITTLE FUN Jokes to Make You Laugh

Full House
Mr. Newlywed—"And if the worst comes to the worst perhaps we can live with your parents?"
Mrs. Newlywed—"No chance there. They're still living with their parents."

Absolutely Fresh
Customer—Are these eggs really fresh?
Grocer—Madam, if you'll step over to the 'phone and call up my poultry farm you will be able to hear the cackle of the hens that laid those very eggs.

Bright Saying
"I wish I had a baby brother to wheel in my go-cart, mama," said small Elsie.
"Why is that, dear?" asked her mother.
"Because my dolls are always getting broken when the go-cart tips over and a baby wouldn't."

A Broad Hint
"Miss Gaylord," said the boss to his stenographer, "you doubtless have noticed that girls today are getting haircuts, smoking and doing many other things just like the men."
"Why, yes; of course I have," she admitted. "But why do you ask?"
"Well, I wish you would also learn to spell like this man Webster," he growled, as he slammed a dictionary down on her desk.

Bobby's Good Turn
Sunday School Teacher—"How many of you made someone happy last week? All right, Bobby, and what did you do?"
Bobby—"I went to see my grandma and she was very happy when I went home."

Brother Johnson: "Sam, dat show is a fine mule, what did you give for him?"
Sam: "I didn't give no money, I jes' give my note."

Brother Johnson: "Shucks, you show did git him cheap."

Ambition
The young Italian immigrant and his wife had just arrived in New York. While walking down the street they were amazed to see a fire engine go racing past, with smoke and flame pouring forth from the funnel. The Italian eyed the departing monster for a moment then, turning to his wife, exclaimed: "Looka Rosa, that's the kinda of peanut roaster we have some day."

Intangible Art
An inmate of an insane asylum imagined himself to be an artist, and he was busily engaged in dabbling at an empty canvas with a dry brush. A visitor asked what the picture represented.
"That," said the nut, "is a picture of the Israelites being pursued through the Red Sea."
"Where is the sea?"
"Why, that's rolled back to allow the Israelites to pass."
"Where are the Israelites?"
"They've just gone by."
"Then where are their pursuers?"
"Oh, they'll be along in a minute."

The Slogan
"What shall we adopt as a slogan?" asked the chairman of the Women's Society for Outlawing War.
"Millions for face powder but not a cent for gun powder," the gathering answered as with one voice."

Bouquet for Dad
Teacher (looking over Teddy's home work)—"I don't see how it's possible for a single person to make so many mistakes."
Teddy (proudly)—"It isn't a single person, teacher. Father helped me."

Natural Mistake
"My goodness," exclaimed the stranger who had dropped into the police court, "they've caught a pretty tough lot this morning, haven't they?"
"You're looking at the wrong lot," said his neighbor. "Those aren't the prisoners. They're the lawyers!"

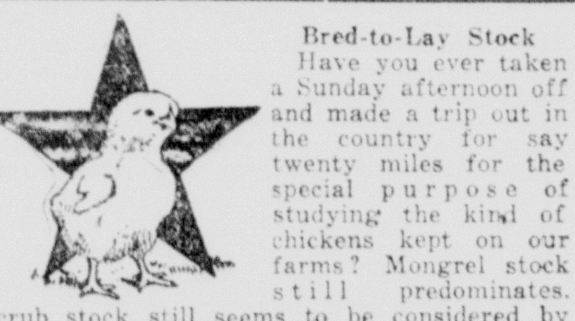

It Didn't Work
Mr. Newlywed—"Yes, sir! To be happily married get 'em young, treat 'em rough and tell 'em nothing."
Mr. Peewee—"But my wife wasn't young when I first saw her and she won't stand for rough treatment, and you can't tell her anything."

Johnny Knew Dad
"Johnny," said the teacher, "if your father owed a man one hundred dollars and promised to pay him five dollars a week, how many weeks would it take to pay the man?"
Johnny—"One hundred weeks."
"You don't know your lesson," said the teacher.
"You don't know my dad, either," said Johnny.

The Foreman's Explanation
Shocked by the language of two line-men, an elderly lady complained to the telephone company, and the foreman was asked to explain. His report follows: "Me and Bill Fairweather were on this job. I was up the pole and accidentally let the hot lead fall on Bill. It went down his neck. Then Bill said: 'You must really be more careful, Harry.'"

Soliloquy on a Dog
An old German soliloquized as follows about his dog: "You was only a dog, but I wish I was you. Ven you go your bed in, you shust turn round three times and lie down; ven I go de bed in, I haf to lock up the place, and vind up de clock, and put out de cat, and undress myself, and my wife vakes up and scolds, and den de baby vakes and cries and I haf to talk him de house around, and den maybe I get myself to bed in time to get up again."
"Ven you get up you shust stretch yourself, yawn a little, and you vas up. I haf to light de fire, put on de kiddle, scrap some vit my wife, and get myself breakfast. You be lays round all day and hab plenty of fun. I haf to vork all day and have plenty of drubble. Ven you die, you vas dead; ven I die, I haf to go somewhere again."

POULTRY FACTS By F. W. KAZMEIER Poultry Breeder, Bryan, Texas.

Bred-to-Lay Stock
Have you ever taken a Sunday afternoon off and made a trip out in the country for say twenty miles for the special purpose of studying the kind of chickens kept on our farms? Mongrel stock still predominates. Scrub stock still seems to be considered by many farmers to fill the bill. Many still believe that a chicken is a chicken, one as good as another. No doubt those same people believe that one chicken lays as many eggs as another, and that there is not much difference between the different chickens from standpoint of egg-production.

Yes, mongrel poultry is the thing, according to many farmers of today.
We do not like to call a spade a spade when it hurts people's feelings to do so. Truly, however, it is discouraging to notice how some farmers persist in blocking all efforts of progress. They have fallen into a "rut" so deep they seem to not care to exert themselves sufficiently to get out.
Mongrel chickens on a farm means that the owner is apt to be a very unprogressive individual, prideless and almost hopeless.
The International Harvester Company has published a book entitled "Farm Poultry Pays." From top of the fourth page we quote as follows: "This book is not written for those unfortunate farm folks who are so far behind the march of farm progress, that they still keep only scrub hens, hens of such uncertain breeding and so carelessly cared for that they produce no eggs in the winter, dirty unmarketable eggs in the spring and blood-ringed, ill flavored, unmarketable eggs in the summer, and leave a few scraggly, undersized, hatched in stolen nests chicks to carry on the unprofitable business another year. One owner of such a flock when urged to get better hens and take better care of them replied: 'It's right smart trouble pickin' up the eggs.' Such folks have 'right smart' trouble making ends meet, and sooner or later they will be driven out of the farm business by those who keep in step with present-day developments."
Gentlemen of the farms, read above paragraph again. The author of that statement undoubtedly knows what he is talking about. Take off an hour after supper and check up on yourself. Mr. "Puttin' Off," count yourself in on this program.

Half a dozen mongrel dogs and a few more mongrel non-descript chickens greet you as you stumble past the front gate on the average farm. Surely this can not be a sign of progress or of prosperity.
There is no earthly excuse for keeping mongrel chickens. They are failures from the day they are hatched to the day the hog or mule puts them out of business.

Mongrel chickens are poor layers—why should they be otherwise. They have no breeding and no bring up. You don't know what they are or where they come from. All you know is that they look, act, and maybe smell like chickens.

Here are a few facts for you to think about: Some chickens lay 350 eggs in one year. Some chickens lay 100 eggs in one year. Many chickens lay only 50 eggs in one year. Some don't lay any eggs. Is there a difference in chickens?

Egg-production is a hereditary characteristic. Trapnesting and selective breeding are the only means of breeding for egg-production.

You breed eggs into a chicken, and by proper feeding bring them out.

The average mongrel hen lays less than 50 eggs in one year. A hen must lay 90 eggs in a year in order to pay her room and board bill.

A flock of bred-to-lay hens are like thoroughbred race horses, pulling at the bridle, anxious for the word "go."

Breeding in chickens is probably one of the most important factors necessary to profitable production.

Present price of bred-to-lay stock is such that any one can own good chickens. It is only the shiftless and indifferent that are not able to keep standard-bred or sometimes called pure-bred chickens.

Mr. Farmer, that keeps scrub poultry on his farm, believes in making excuses and putting it off, instead of seeking means by which he can replace his flock of mongrels with standard breeds; he spends his time thinking up excuses or in some other justifications for his mongrel flock.

The mongrel hen eats just as much feed in a year as a standard-bred hen and lays an average of only one-fourth as many eggs. Still she reigns supreme on many of our farms.

The start, the foundation, the success, in fact everything of a profitable poultry flock depends upon whether they are mongrels or thorough-breds.

Cross-bred stock is but little better than mongrel stock.

BRIEF TEXAS NOTES

Texas cotton acreage for 1930 was estimated 17,500,000. Corn, with 4,896,000 acres, had second place. There were 2,520,000 acres in wheat and 1,833,000 acres in oats.

Seventeen towns in the Rio Grande Valley had 37,227 population in 1920 and 92,784 in 1930, an average gain of 149.2 per cent.

Texas has thirty-six towns and cities of more than 10,000 population. Seven of them are new-comers on the list and one of them had only 987 inhabitants ten years ago.

Texas led all the West South Central Division of States in percentage gains in population from 1920 to 1930. Texas had a gain of 24.6 per cent. Louisiana with 16.7 per cent was next. Oklahoma with 12.8 per cent was third.

Texas produced 62 per cent of the carbon black produced in the United States in 1929. The Texas production in 1929 was 228,183,000 pounds.

Texas has enough bituminous coal underlying its territory to supply 10,000,000 tons a year for 800 years, according to the Texas University Bureau of Economic Geology. This is exclusive of estimated 20,000,000,000 tons of lignite under the Texas soil.

Brewster county, Texas, is the greatest county in the United States in the production of quicksilver. The production of quicksilver in this county is \$2,500,000 worth annually.

Texas continues to lead the States in oil development. There were 2,295 new oil wells in this State during the first six months of 1930.

What is believed to be the largest field under one fence in the country was broken and sown to wheat this fall by Hickman Price, the most extensive wheat farmer in the Panhandle of Texas. The field contains 7,000 acres. It was the home of roving cattle for the last 50 years, and long before that buffaloes and wild Indians were its only occupants. The eleven-section tract

of land lies in Swisher and Castro counties.

Corpus Christi is only four years old as a port, yet it is the fourth port in the United States in the matter of cotton receipts. This season the Port of Corpus Christi will handle more than 550,000 bales of cotton. It is led in cotton receipts only by Houston, Galveston and New Orleans.

What is to be the first anti-mony smelter in the United States is now under course of construction at Laredo. The first unit of the smelter will cost \$100,000, but with the completion of all proposed units the investment will reach \$500,000.

The Texas citrus industry of Texas is but little more than a decade old, yet it represents an investment of \$100,000,000. Shipments in 1931-32 are expected to reach about 15,000 cars.

HEDGECOCK COMPANY GETS GOVERNMENT CONTRACT

Additional Government contracts have been awarded the Hedgecock Artificial Limb and Brace Company of Dallas for regional offices of the United States Veterans' Bureau at San Antonio, Oklahoma City, Little Rock, New Orleans and Denver. The Hedgecock Company has had a contract with the Government covering the Dallas regional office since the organization of the Veterans' Bureau and prior to that time furnished limbs to ex-service men through the Bureau of War Risk Insurance. The awarding of these additional contracts makes it possible for ex-service men of these districts to come to Dallas for new limbs or repairs. Heretofore the men had to be cared for in their own districts. The Hedgecock Company is the oldest artificial limb concern in the South having located in Dallas seventeen years ago. The company makes it a practice to employ only those minus a limb. Two mechanics in the factory have both legs off.

No Uncertain Tones

From the very first day of their long service, your loud speaker praises them—in no uncertain tones.

THERE'S A BARGAIN IN TOWN!

42 Eggs for 37c. This bargain is in your very town...in a bag at The Store With the Checkerboard Sign. In this bag are 100 pounds of Purina Laying Chows...in this bag are 42 more eggs than are in the average bag of more than 125 other feeds. This bag of Purina Laying Chows costs an average of 37c more than the average bag of these other feeds. 42 eggs for 37c. These are figures which come from thousands of poultry yards like yours. These are figures gathered in the 1929 national survey of 3,007,718 hens...a survey covering 48 states...a survey conducted by 870 men...a survey still going on.

When you buy feed for your layers you are buying eggs in a bag. Consider, then, what a bargain you get in a 100-pound bag of Purina Laying Chows...239 eggs...almost 20 dozen...all in 100 pounds of feed. 42 of these eggs are extra...42 eggs which cost 37c...less than 12c per dozen...what a bargain!

Glance at today's price of eggs. Compare it with eggs at less than 12c per dozen. A bargain it is...a bargain which is all yours when you feed Purina Laying Chows. Any hour you happen into town this bargain will be waiting for you...at The Store With the Checkerboard Sign. Ralston Purina Company of Texas, Inc., 1522 East First Street, Fort Worth, Texas.

THE PURINA POULTRY CHOWS
CRICKEN CHOWDER (mash...for eggs)
LAY CHOW (mash...for eggs)
HEN CHOW (scratch...for eggs, for growth)
STARTER CHOW (mash or all-mash...for chicks)
CHICK CHOW (scratch...for chicks)
GROWER CHOW (mash...for growth)

TEXAS FARM NEWS

A tree with approximately 125 varieties of apples on it has been grown near Martinez, Cal., by George Upham. It required twelve years of experiments to obtain this phenomenon. Mr. Upham has been grafting branches to the original tree since 1918. In the spring the grafted limbs bud at different times, with blossoms in dozens of shades.

Joe Simmons, a farmer of Hansford county, has a flock of 2,200 head of turkeys that were hatched in incubators. The turkeys proved very effective in the destruction of grasshoppers during the summer, and neighbors of Mr. Simmons sought their aid. The turkeys proved efficient in controlling the grasshoppers and thrived on the ration.

One million acres of land in Texas was protected from soil erosion by terracing last year, Mr. Bennett, of the Bureau of Chemistry of Soils, said in a recent discussion of problems dealing with land. Mr. Bennett said that erosion recently measured on Texas cotton soil showed that 27 inches of rainfall removed 40 tons of soil per acre on land sloping only two feet in 100. "Fully 75 per cent of the land in cultivation today throughout the United States is as steep or steeper than this Texas field," Mr. Bennett asserted. According to observations, measurements and estimates, approximately 17,500,000 acres of land that were formerly cultivated in this country have been destroyed by gullying or so severely washed that farmers cannot afford to attempt their cultivation or reclamation, Mr. Bennett added.

With a yield of 270 bushels of Irish potatoes per acre, J. T. Casey, a 4-H club boy of Los Frenos, Cameron county, has beaten his father for the second successive year. Using certified seed he got 172 sacks, while his dad got 125 sacks from an adjoining patch planted to number one seed. The boy got a net profit of \$460.59.

A new method of propagating sweet potatoes by using leaves of the plant, or part of the leaves, has been discovered by the horticulturist of the Alabama experiment station. The new method, the horticulturist believes, will mean bigger and better yams, since the commercial value of the plan appears to be greater than any method yet discovered except the old bedding method. He has been successful in getting six different types of leaf cuttings to regenerate roots quickly.

An item from Farmersville, Collin county, says many cotton growers of that section obtained excellent results this year in leaf worm control by the use of a spray prepared as follows: Two pounds calcium arsenate; one gallon concentrated lye; two gallons of water. The mixture is boiled until the arsenate is thoroughly dissolved and then strained into 100 gallons of water, which makes a spray sufficient for about three acres. The spray has been used in the Farmersville section by one cotton grower for three years and has been attended with fine results. He says that it is not harmful to chickens or turkeys eating the worms, but advises that the pot in which it is boiled be kept out of reach of stock.

The cattle ticks are rapidly disappearing, in spite of the predictions of many that these pests could not be eradicated. The indications now are that the entire South will soon be tick-free. The ticks now remain only in Florida, Texas, Louisiana and Arkansas, and in these States they are rapidly becoming less numerous and less destructive. The successful eradication of the ticks from North Carolina, South Carolina, Georgia, Alabama, Virginia, Tennessee, Missouri, Kansas and Oklahoma was a great triumph for Southern agriculture, and when the work is finished in Florida, Texas, Louisiana and Arkansas, which will be in a very few years, the South will owe a great debt of gratitude to the pioneers and later leaders in this movement.

A well known poultry expert says under ordinary temperatures a louse will not live more than a week removed from a bird, so if louse-free chickens are to be placed in a hen-house previously occupied by other poultry, it is necessary only to clean the house a week or so in advance. Incubator-hatched chickens can be reared louse-free quite easily if they can be isolated from other chicks, he says. To rid birds of lice the sodium fluoride treatment is recommended by him. Pinches of this material distributed among the feathers is the usual procedure. It is a somewhat irritating substance, so precautions should be taken to prevent its getting into the eyes or widely distributed over one's skin. If the bird is dusted over a paper, the dust which does not stay on the bird can be saved and used again.

Secretary of Agriculture Hyde said recently that Nebraska experiments in substituting wheat for corn in feeding livestock had resulted in hogs selling at \$11 a hundred pounds, representing a return of \$1.50 a bushel for wheat. The experiment was made by the Nebraska State College of Agriculture and because of the feed situation resulting from the drouth, the secretary considered the results highly satisfactory. Ground wheat at 75 cents a bushel for the whole grain fed in self feeders with tankage, produced gain on hogs at a cost of \$5.98 a hundred pounds. It was shown that this ground wheat and tankage made 100 pounds of gain at a cost of \$1.67 cents less per hundred pounds of pork than the gain made on corn and tankage fed in this way.

At Edinburg is perhaps the largest duck farm in Texas. There are about 10,000 Imperial ducks in this great flock, which is owned by Jack Ross, Jr. Feed for the huge flock is shipped into Edinburg by the carload, and feeding time is a great show for people who witness it. Early in the morning and again late in the afternoon the grounds are literally covered with the snowy white birds. In addition to the large flock of youngsters fed in Edinburg for market, Mr. Ross has 1,000 ducks and 200 drakes at La Joya, which are kept for breeding purposes. During the laying season he gathers about 1,500 eggs a week. The eggs are taken to a commercial hatchery and there turned into ducklings. The ducks are ready for market at the age of twelve weeks, when they weight from six to eight pounds each. The ducks are shipped to San Antonio, Houston and Dallas, where a ready market is found for them.

A study of the reports of the Bureau of Agricultural Economics shows that there has been a decline of 32.4 per cent in the value of farm lands of the United States in the last ten years. The reports show that in 1910 the average value of American farm land was \$39.60 per acre. By 1920 the peak was reached with a value of \$69.38 per acre, or an increase in ten years of approximately 75 per cent. From 1920 to 1930 there was a decline of something like 32 per cent, according to the bureau report. While the present values are about 15 per cent above the pre-war average farm real estate, however, when based upon the lower purchasing power of the dollar, is really worth about 20 per cent less, the bureau report states. It is interesting, and somewhat discouraging to note that while the farm-land values have shown a heavy decline in the last ten years, farm taxes show a heavy increase for the same period. The increase in farm taxes during the last ten years has been about 70 per cent, even though the value of the lands has declined 32 per cent. Under this condition it is not surprising that such a large number of people have left the farms of recent years. The bureau reports show that in 1927, 604,000 people left the farm; in 1928, 598,000, and in 1929, 619,000. Economists tell us that there must be a further reduction of the farm population before prosperity can return to the farmers, since the productive capacity of the average American farmer has been greatly increased through the perfection of more efficient machinery.

The decline in the value of farm lands was greatest in the West, North Central and East North Central States, composed of Minnesota, Iowa, Missouri, Nebraska, Kansas, Ohio, Indiana, Illinois, Michigan and Wisconsin. These States show an average decline in the value of farm lands of 40 per cent—of 47 per cent for Iowa and 50 per cent for Indiana. The West

South Central group of States, which includes Texas, shows an average farm-land value decline since 1920 of 23.2 per cent. Texas is given a figure of 20.7 per cent, the smallest decline in its group. The highest in this group is Arkansas, with a decline of 36.5 per cent. The smallest declines were in the New England and Pacific Coast States. Connecticut is the lowest in the United States with 2.2 per cent.

Recently a timber survey of Jasper county was conducted by Chamber of Commerce of Jasper, which showed that the people of that county are getting splendid returns from their timber holdings. About 550,000 acres in Jasper county are in timber, and in 1929 more than \$4,000,000 worth of timber products were sold. The principal timber product sold was lumber, to the amount of \$3,743,000. Other items were: Cross ties, \$44,500; materials for crates, boxes, barrels and baskets, \$112,000; poles, \$26,000; posts, \$10,000; hickory logs, \$9,000; piling, \$18,000; staves, \$20,000, and pulpwood and other wood products, \$20,000. Much of the lumber cut was from virgin forests that must be replaced.

J. P. Bellew, an Ellis county farmer, reports that he increased the milk flow from seventeen cows 125 pounds per day within ten days of the time the cows were turned upon a sweet clover pasture for grazing. A 15-acre patch of second-year sweet clover pastured 21 head of beef yearlings for 23 days in February, 22 head of milk cows every night until July 10, fourteen head of work stock one month, and 200 head of sheep at various times. And in spite of this heavy pasturing, the clover seeded out about waist high. From a patch of sweet clover planted in February, L. C. Parks, another Ellis county farmer, cut two tons of good hay per acre, and on four and a half acres pastured fifteen head of stock continuously from April 1 to July 20.

Two hundred acres of Laredo soy beans were grown by ten Van Zandt county demonstrators this year as a dairy feed. Demonstrations have shown that this feed when ground is at least the equal of alfalfa. This legume is said by the county agent to be meeting with so much favor that farmers expect to use it to replace hundreds of acres of peanuts as a dairy feed.

A few farmers in Gaines and Terry counties last year plowed their lands to a depth of twelve to eighteen inches, through the use of heavy machinery. Clay was plowed up on top of the shinary sands, which stopped blowing and almost doubled the yields of cotton and grain sorghum. It is believed that through this method a million acres of land may be transformed from the sub-marginal to the safe-farming class. One treatment is said to be sufficient, and cost is not prohibitive.

J. E. Henry, of Nursery, Victoria county, found Golden Bantam sweet corn a profitable crop this year. A fifteen-acre field of the corn yielded 1,505 hamper bushels which were shipped in carload lots to northern markets. His net profit was \$1,205.50, or \$80.44 per acre. The corn was planted April 9, on light sandy soil. The expense was \$75 for fertilizer, \$37.50 for seed, \$75 for rent of land, \$10.90 for team and man labor, and \$100 for harvesting and packing.

In a recent dress contest in Delta county 92 home demonstration club women in eleven communities made 91 house dresses for \$138.85, the cheapest costing 89 cents and the most expensive \$2.30. Printed dimity or batiste costing from 30 cents to 50 cents per yard was used, and special attention was given to lines and construction. That the garments were well made is indicated from the fact French seams were used on the sides, whipping stitch in hems, and overcasting for belt line and sleeves.

For BOYS and GIRLS

By AUNT MARY

PUZZLERS

By WALTER WELLMAN
GIRLS AND BOY

If you will print the names of the five objects in a certain order in the horizontal columns of the form in the center, you will have the names of two girls reading downward in two adjacent columns and the name of a boy in the next upright column. What are the three names?

RIDDLES

1. What kind of books do burglars keep?
2. What weeds and flowers should grow on every dairy farm?
3. Why is a sheep like a watch?

NOVEMBER DAYS

It affords me much happiness to again greet my dear boys and girls these crisp November days. The stack of letters from them contain many messages from dear "Sunshines" and "Shut-Ins" and many messages from new friends, also. I love to open the "Sunshine letters." They are so wonderful—so full of life—both of sunshine and of sorrows. It really requires both, sunshine and shadow, to make a full and happy life. This makes me think of the little poem in your second reader. I hope you all have learned it by heart; if not, do it now.

"If all were rain, and never sun;
There'd be no bow across the hill.
If all were sun, and never rain;
There'd be no rainbow still."

We want our club to supply the sun through the rain to make the rainbow—in the lives of our unfortunates. How thrilled I am every day of my life to know that in this great world of ours God's sun is shining in the face of little children. He is so good to us. He said "Let the little children come unto me and forbid them not; for of such is the Kingdom of Heaven." We can all bring the Kingdom of Heaven closer to earth by our good deeds, our true faith and lifted hearts. Every month there comes to my attention more and more good that you wonderful members of the Sunshine Club are doing. On every hand is evidence of your great and good work. Keep it up, and get others to join in this constructive plan of spreading sunshine to others.

I asked Aunt Susan last month to tell you about the youngest and the latest member of the Sunshine Club. We have named him "William Byrd," and in his baby way he sends his love to all, promising to grow up a big sunbeam in the service of the Lord. The name William, you know, means "protector of rest, defender of tranquility." Work for the Sunshine Club, dear boys and girls; work for the happiness of others.

Yours in happy service,
(Signed) AUNT MARY.

SUNSHINE CLUB NEWS

There are so many letters this month that we are going to give first space to them. I am sure you will all enjoy them just as much as I did. Here they are:

Bertie Mae Cumming, Rockdale, Texas, writes such a lovely letter and tells about picking 85 pounds of cotton a day. I think this is fine. I am always glad to know my boys and girls are helping their parents with the work. I like to work and I like to hear that others are working.

Mildred Whitely, Rockdale, Texas, is also helping to pick the cotton crop. I am sure she is a dandy girl and we are so glad to have her in the club. I wonder if Bertie and Mildred know each other. If they don't, I hope they will get acquainted.

Miss Willa Mae Candler, general delivery, Soper, Okla., writes such a sweet letter. She tells of great accomplishments, even with the handicap of lameness. Last year she finished high school. When Willa was seventeen months old she was stricken with paralysis, but while going about in a wheel chair she finished through high school; think how many boys and girls complain of going to school when they have two good feet with which to romp and play. I think she is very brave and a great example. I only hope she will continue to do well while things and be an example to other Shut-Ins that are bound to a wheel chair. I would like to suggest, Willa, you write to Shut-Ins whose names are printed on this page; by so doing you can form new friends.

I also have a letter before me that is one of the most beautiful I have ever read. It is from a woman who is an invalid and has been so for sixteen years, but her beautiful spirit has risen above the pain-ridden body and has "dimpsed" God's flowered fields beyond the hills. I am sure she will not mind my publishing her letter, in part, as I feel it might give to others the courage "to go on." Here it is:

"A friend has just sent me a clipping concerning your club and I am writing for membership, for I would be pleased to join and will answer letters if a stamp is enclosed by those otherwise than Shut-Ins. I know they are not able to do this and with the title of my income, which is tiny, I will try to send letters to others, although I cannot write as much as I would like to owing to my condition. However, I thank God there are days that He gives me strength."

"Aunt Mary, did you know National Hymn Sing Association, 96 Columbia Heights, Brooklyn, N. Y., loans books free to Shut-Ins, paying the postage both ways, and I am so glad to tell you about this so you might find room to publish it in your page. Your name is the same as my dear mother's; no doubt, like hers, your life is lived as beautifully. May God bless all your undertakings in His good work, dear heart. For only those that are similarly situated can know the meaning of cheering letters, etc., to the Shut-In. Am trying to help be a bread-winner, as my sister, who lives with me, is also afflicted, but thank God, not as helpless as I. Lovingly, (signed) Beulah E. Lamb, R. F. D. 1, Box 9, Hazel, Kentucky."

While I read the above letter I was lifted above the sordid things of this world, and could see in the homely tasks of everyday service the work of the Master Hand. The letter should be an inspiration to every person who reads it.

From far-away New York City we have a letter from an invalid who wants to join our club. So, you see, our work is spreading far and farther; that our duties are becoming

greater and the light of sunshine is finding very dark corners. Mrs. Grace C. Koch, 353 E. 146th St., New York City, is a lady 60 years of age and because of broken bones cannot do the things she would like to do and has always done. She is lonely and suffers a great deal. I hope many of you will write her.

There was a letter from Mountain Park, Okla., to which the writer forgot to sign name and address, therefore Aunt Mary could not add the name to our Shut-In list. Will party please write again?

Then there is a sweet letter from the mother of a darling girl who is a Shut-In member. Isn't it worth all the trouble to receive such a letter as this? "Dear Sunshine Club: Will write you and let you know I still enjoy being a member of your club. Have received lots of letters and some few presents, such as handkerchiefs. Three cheers for the Sunshine Club and dear Aunt Mary. Your little sunshine friend, Louise Sluder, Rousey City, Texas."

The letter from Mrs. Frances Johnson, Route 1, Mount Pleasant, Texas, speaks for itself by showing the great need of this work of spreading sunshine. "I am sending the coupon. I am a Shut-In, and have been for twelve years in the bed; have not walked a step. Have only one daughter to work for me and her two children. Any sunshine your club can send me will be appreciated. I will forever thank your club. I am a widow. Thanking you in advance."

Another case that is very unfortunate was called to my attention this month. I am not going to reveal the names because their condition is sad indeed. There are five grown children in one family that are feeble-minded and three that are helpless invalids, not being able to walk a step. Think of the grief to the two aging parents. Wouldn't a little sunshine help to "brighten the corner" here? I am sure it would.

A sweet girl (I know she is sweet from her letter), writes the following: "I am fifteen years of age, but I would like to be a member of your Sunshine Club. I am in the eighth grade at school. I noticed your page in the paper and enjoyed reading it. I would like to write to those who would like to hear from me. (Signed) Ruby Restine, Waynoka, Okla."

I have a letter from a boy that I prize very highly because from it I have a mental picture of the real "American Boy," one that makes the heart of a mother happy and his daddy proud. He says: "I have been reading the Boys' and Girls' page for several months. I have decided to join the Sunshine for Shut-Ins Club. I hope I will like it. I live in the country. I am in the sixth grade. I am thirteen years old. Last winter grandfather taught me how to milk the cows. So this spring he gave me a calf. I named her Queen. She does not have any horns. I think she is beautiful. I have three pets—two kittens and a dog. I hear you have a beautiful little baby boy and I would like to suggest a name for him, if you have not named him yet. I think Charlie Joe is a pretty little name. (Signed) Montie Curry, Killeen, Texas."

I am sorry, Montie, I had named my little son before I got your letter, but I think the name you suggested is very pretty and would fit him just fine.

A faithful Shut-In member sends in thanks. Her name is Mable Brown, of Hamlin, Texas, and she is one of our most faithful Shut-In members. Mable is a girl you can depend on, and folks, that is saying a whole lot for any girl, since dependability is one of the most desirable characteristics in a person. Mable writes:

"I wish to tell you of your wonderful Boys and Girls page and of my appreciation of being able, physically, of course, to keep up with the letters of our Shut-Ins, besides my other correspondence; mere words cannot express all it means to me, but will just say it is more pleasure to me than anything. I have very little strength, but enjoy writing so much. I have found several very dear friends since being a member of the Sunshine for Shut-Ins Club. Oh, I wish you could all see the beautiful bouquet that I received from some friends at Lamesa, Texas. The sweet perfume of the flowers fills the whole house. I do love flowers more than I can tell. May the Sunshine Club live long, is my prayer."

Thank you, Mable, for the lovely letter. Don't forget, little folks, Mable has written a lovely little book that she sells for a quarter and thus makes her pin money which she uses to spread cheer to other Shut-Ins. It is worth reading.

Here is a letter, boys and girls, I am sure you will enjoy reading. It is from Peter Dyer, Bokchito, Okla. Peter is a Choctaw Indian. He says: "I want to be a member of the Sunshine for Shut-Ins Club. I am a 16-year-old boy. Please do not forget me—I found the coupon in the paper." We welcome you, Peter, into the club.

May McKinney, County Line, Okla., writes the following: "Please accept my membership into your Sunshine for Shut-Ins Club, as I want to be a help to those that are afflicted and cannot enjoy this wonderful out-of-doors that God has so blessed us with. Wishing to be received."

We are happy to have you, May. You are received with open arms.

There are many other new members who sent only short letters, or membership coupons only. I wish we had room to print all the names here. But to each and everyone let me say: We all extend to you the heartiest and most cordial welcome. We are so glad to have you and we hope that you will find pleasure in bringing happiness to others.

Now, I am going to give you the high points in Aunt Susan's last letter:

"Good morning * * * I hope you and those darling kiddies are as well and happy as I would want them to be. * * * I have not been well since coming home. I have an awful, sneezy cold; I went to the doctor yesterday and he asked me how I felt. I told him I did not feel near as well as I wanted to, but I did not feel near as bad as I could. Our blind lady did not get a letter in September. (We are sorry). I would like to suggest a name for that darling baby. I suggest Lawrence Omar."

I love the name, dear Aunt Susan, but William is such a substantial name and the Byrd is for my father. How do you like it? Let us hear from you every month, dear; your letters mean so much.

Since you may have read what the other folks say about the Sunshine for Shut-Ins Club, perhaps you will want to join. If so, we are going to explain our simple rules and ask you to send us the membership coupon. The rules are: Any reader of this newspaper can join. There is no age limit at either end of line. There are no fees, assessments or dues. It is all free. You simply fill in the membership coupon and mail to Aunt Mary, Box 1012, Fort Worth, Texas. We will send you a membership card that will bear your name and address; also in the upper right hand corner of the card will be the letters of the division to which you belong. Each month on this page is printed the names and address of persons who are Shut-Ins, and before each name will appear the letters of the ones who are to write

to this Shut-In. We try to limit ourselves to ten cents for the amount we spend for sunshine, if any gift is sent. Clip out the membership coupon and mail at once to Aunt Mary, Box 1012, Fort Worth, Texas.

Shut-In List

Because of the great number of letters this month I am going to print only the names of the new Shut-Ins and ask all the members of the club to write to at least one of these. Next month will be the complete list again.

X-Y-Z-A-A-Doris Hutchinson, Morris, Okla., Route 1, in a chair; age 22.
A-H-A-C-M-Mrs. Frances Johnson, Mount Pleasant, Texas; age 60; in bed.
C-D-E-F-Mrs. Grace C. Koch, 353 E. 146th St., New York City, N. Y.; in a chair.
G-H-I-J-Beulah E. Lamb, Route 1, Box 9, Hazel, Ky.; in a chair.
K-L-M-N-Miss Bertha Bentley, Route 3, Rush Springs, Okla.; in bed; age 22.
O-P-Q-R-Rob. Boyd, Route 3, Box 813, Scurry, Texas; blind; age 22.

NATIONAL POULTRY SURVEY

Feeds make a big difference in egg production. That is a thing known by every poultry feeder, and it is the hen that decides which feeds produce the most eggs. Last year more than 3,000,000 hens, scattered in poultry yards in every one of the 48 States, were questioned in order to get an answer to this problem.

Quizzing the hens is a part of the work done by Purina Mills and its force of nearly 1,000 service men, in making up the National Poultry Survey, a compilation of poultry feeding and egg production facts. The survey is a check-up to ascertain just how many eggs certain feed combinations will produce and how much money is left for the feeder after all expenses are paid.

Good hens and poor hens are included in this National Survey. It is a survey of average poultry feeding conditions, including farm flocks and commercial poultry plants; all classes of birds, all types of poultrymen and in every section of the country. It is a part of the work done by Purina Mills to persuade farmers and poultrymen to keep accurate records.

The nearly 1,000 Purina service men, working among farmers and poultrymen in every State gather the figures on which the National Poultry Survey is based. Figures come from the flock owners themselves, the Purina man copying on his records just those figures which are given him by the farmer he contacts.

Accuracy that is not surpassed in the national mint where money is counted marks every step of the poultry survey. Reports gathered by the Purina service men are sent to St. Louis where they are carefully checked, compiled and totaled and then checked again. The final result is the poultry survey which shows just what average poultrymen of the country are doing under average conditions.

Thousands of poultrymen have been set on the trail to bigger profits as a result of the revelations made to them by this survey. Too busy themselves to keep complete and accurate records, they have found, from the compilations made by the Purina service men just where a lot of their profit leaks were taking place. They have learned, by reason of figures which they know to be accurate—figures on their own birds and on the birds of their neighbors—that there is a big difference in feeding and management.

And every man shall receive his own reward according to his own labour. For we are laborers with God; ye are God's husbandry, ye are God's building.—First Corinthians, iii, 8-9.

ST. LOUIS' FINEST HOTELS

MAYFAIR
In center of business district. Floor and bed. Bathing, circulating water and bath in every room. Garage service. Corner 5th and St. Charles.

A. Bahr, Ordway, Colo.

FREE HOMESTEAD LAND IN NEW MEXICO—Can take 400 acres, ten million new land. For information, write H. E. SEWARD, Ft. Sumner, New Mexico.

COTTON ACREAGE AND PRODUCTION

The acreage devoted to the growing of cotton in Texas is by no means a reliable index to the amount of cotton produced. Figures for recent years show there is no necessary relation between the extent of the acreage planted to cotton and the number of bales of cotton harvested.

For example, in 1920 Texas produced a crop of 4,345,282 bales on 11,897,000 acres. Two years later, in 1922, on 11,874,000 acres a crop of only 3,221,891 bales was produced, a decrease of 1,223,000 bales, on virtually the same acreage.

Three years later, in 1925, there was an acreage of 17,608,000 acres, and a crop of only 4,165,000 bales—or 180,000 bales less than was produced on 1,897,000 acres in 1920.

FARMS AND RANCHES

KANSAS

90 ACRES for sale, 6 miles east of Paola; well improved, watered by spring and well at house; only \$66 per acre, cash or trade. Address H. W. Buss, Route 3, Oswatomie, Kansas, owner, or write C. E. Rossmann, Probate of Paola, Kansas.

FOR SALE OR EXCHANGE
A-1 FARM for trade for farm or tourist park. T. M. Ward, O'Donnell, Texas.

OIL LEASES

FOR SALE—Oil lands and leases; stock and dead ranches; businesses and homes. Properties. Location here for canning factory, second-hand store, refrigeration plant. Correspondence solicited. L. Wiley, Greyhound, Wyoming.

2229 PART of royalty on 1,560,000 acres, on which there are 2,500 producing wells, carrying 1/8 royalty, none deeper than the Wilcox sand; Government approved title and known as Oase Headrights. For particulars write Box 902, Tulsa, Okla.

FOR SALE—6,000-acre solid block oil lease ready for immediate delivery. G. W. BROWN, Box 476, Jefferson, Texas.

REAL ESTATE

Owners, Buyers, Sellers
and dealers in oil properties, lands, notes, city and town properties, get my proposition. I charge no commissions; my business is finding bargains for buyers.

E. B. Reeves
Alamogordo, Gray County, Texas.

India

SAN ANTONIO TO CELEBRATE 200TH ANNIVERSARY

Next year San Antonio is to celebrate her bicentennial—the 200th anniversary of the founding of her municipal government. Already a bicentennial committee of 100 has been appointed to plan for the celebration, and the company has been granted a charter by the State.

The celebration will include the anniversary of the establishment of the missions of La Purissima Concepcion, San Juan Capistrano and San Francisco de la Espada.

New loveliness for your skin

BEAUTIFUL women follow Pond's famous Method for exquisite care of the skin:

One, for immaculate cleansing apply Pond's Cold Cream several times a day, always after exposure.

Two, remove the cream with Pond's Cleansing Tissues, soft, absorbent, economical.

Three, briskly dab with Pond's Skin Freshener to banish oiliness, tone and firm.

Last, smooth in Pond's Vanishing Cream for powder base and protection.

Pond's famous Two Creams, Cleansing Tissues, Skin Freshener

LARGE GIFTS FOR EDUCATIONAL PURPOSES

Will C. Hogg, Houston capitalist, who died in September while visiting in Baden Baden, Germany, left large gifts for educational institutions of Texas, and made special provision in his will for student welfare.

Several special scholarships in the University of Texas were created in honor of friends of Mr. Hogg. For the Student Loan Fund of the University of Texas he left \$100,000, and to the Loan Funds of A. & M. College and the College of Industrial Arts at Denton, \$50,000 each. To Rice Institute, and each of the State Teachers' Colleges of the State he left the loan funds \$25,000.

Mr. Hogg was a son of James Stephen Hogg, who served four years as Governor of Texas, 1890 to 1894.

BUFFALO SKULL FOUND 20 FEET BELOW RIVER BED

While excavating for the Bridgeport Lake dam, in Wise county, workmen found the petrified skull of a buffalo 30 feet below the bed of Trinity River. The skull was in perfect condition and the horns were intact. No estimate has been made of the age of the specimen. The theory advanced is that in the long ago a buffalo became trapped in the bog of the river and perished.

HOME PROBLEMS.

PLANTING A BULB GARDEN

While it is a comparatively easy thing to grow flowering bulbs, yet to attain the maximum of perfection it is necessary to follow a few simple rules.

With bulbs, as with anything else in life, there is a difference in quality. As a rule there is a close relationship between quality and price. We usually "get what we pay for." If you hunt only for bargains in this line, all you usually get is a "bargain," and not very good bulbs. By this we do not mean to pay the highest price in the catalogue, but consider quality first and price afterwards. It is most important to select a good, healthy, high class bulb rather than an inferior one that will produce, at best, a sickly imitation of a beautiful flower.

Bulbs at their best are firm, sound and plump. Examine the bases of bulbs; if they are soft it is a rule an indication of disease.

Many bulbs contain a complete embryo flower when ready for planting. By cutting a bulb in half from top to bottom it is easy to determine whether it is good. If the embryo flower has turned black from heating in transit, sterilization, improper curing, or other cause, the bulb cannot possibly bloom the first year, and sometimes not at all.

After one has determined that the bulb is healthy, and in fruiting condition, consider the size. The bulbs of tulips, daffodils and crocuses should be large and heavy to produce the best results. In hyacinths the medium-sized bulb is the best, because it does not produce a top-heavy stalk.

Prepare the ground for bulbs before they arrive. Most of us fall into the careless habit of "waiting until the last moment" to do a thing. We often wait until we have the bulbs before we prepare the soil. This is a mistake. As a rule the earlier you plant your bulbs the better they will do. By starting to plant your bulbs the first part of November, in the order named, leaving a week between the varieties, good results should be obtained: Daffodils, crocuses, early tulips, late tulips and then hyacinths. Do not wait until the bulbs arrive.

however, but prepare your ground in advance and then put them in the ground before they are damaged or destroyed accidentally.

Whether the bulbs are to be planted as borders, or in beds by themselves, follow the same procedure in preparing the land. Plow or spade the soil from eight to ten inches deep; turn over and thoroughly pulverize; at the same time thoroughly mixing in the fertilizer. For best results one may use very coarse ground, or crushed bone and fine bone meal or bone flour in equal parts; three to five pounds per 100 square feet. Never place fertilizer around the bulb in the same hole, but mix with the soil. If the ground is hard and lumpy, a good watering a few hours before turning will be of great benefit.

Be sure to plant the bulbs deep enough. In the average garden soil, that is, a medium heavy loam, tulips should be planted about four inches deep, daffodils about five, and hyacinths six; in all cases see that the top of the bulbs are well covered. When crocuses are planted they should be put at least four inches deep, as they have a tendency to work up.

Bulbs should be planted as soon they are received (plan delivery when you are sure ground will be ready), and in case it is impossible to plant at once they should be carefully packed in peat moss after they have been examined and all diseased or injured ones removed to another box, to be returned.

After the soil is ready for planting, and the bulbs assorted, lay them out four to six inches apart. With an ordinary cement trowel dig a hole the desired depth and place your bulb upright and cover with soil, being careful not to leave any air pockets around the roots, as sometimes happens when a stick is used to make the hole. If it is late in the season and quite dry it is advisable to water thoroughly after planting.

Here is hoping for your success with a lovely flower garden next spring. Now is the time to plan and do the necessary preliminary work. "Luck," you know, is "pluck" with the "P" WORKED OFF.

THE HOME MEDICINE CABINET

Every home should be equipped to take care of emergency cases at all times. There are certain "accidents" that we should be ready to cope with at a moment's notice, because no home or family is immune against unexpected events. We may go ever so long and "nothing will happen," then all at once the most distressing incident upsets the household.

First, in importance, there should be one or two rolls of gauze bandages, either one or two inches wide (kept in their original package, of course, until ready for use), a package of absorbent cotton and a roll of adhesive tape. These three articles should be kept in a clean, handy place, to be used in the dressing of wounds. When any one of these is about used up, replace it at once.

Then, every home should have a good fountain syringe that has at least a two-quart capacity and that has the hard rubber tube for adult enemas, a small-child size, and a soft rubber to be used in giving high enemas to children. Ask your doctor about the use of enemas, and exactly how and when to give them. They have saved many unfortunates from a long spell of sickness.

It is wise to have a clinical thermometer; in a few minutes your family doctor can teach you how to use and read one. By taking tem-

perature and recording all symptoms, you can have your doctor prescribe over the phone and save the expense of his calling. When there are small children, it is well to have a rectal thermometer (one made for this purpose). I prefer the rectal thermometer at all times, as it is more accurate.

It is wise to have a bottle of vaseline, a small bottle of a good disinfectant (keep out of the reach of children), a pair of scissors, a pair of tweezers, an eye cup, and, where possible, an ear syringe.

A good foot-tub is a very comforting article to add to the "home treatment list," but if this can not be afforded the family wash tub will answer.

To the list of necessities we may add a bed pan, a slop jar and a wash pan. A rubber sheet is a great convenience, but oil cloth will answer the purpose and is not so expensive.

By having the proper equipment, home care of the sick is made easier and safer for both patient and "nurse." This equipment need not be expensive to be useful and handy. A little forethought and a little planning will help a lot. We all hope for little or no sickness, or accidents, but when they do arise it is well to be able to meet them safely.

NEW WRINKLES IN IRONING

Each year sees improvement in machinery, both for out-of-door and in-door work; but nowhere has greater progress been made than in equipment for the home.

One of the greatest blessings to the busy mother is the iron with automatic switch control. Mother is ironing—Johnny cuts his hand—mother must apply first aid—she forgets the iron. You know the rest of the story. But the ending is different if you have one of the electric irons that switch themselves off when a certain temperature is reached. Practically all the new irons are fashioned of chromium plate,

which does not discolor or tarnish. There is one with a beveled-edge sole, and a hole in one side into which buttons fit. This makes it possible to iron under the button without pushing it off.

Standing while ironing is almost as ancient now as the "dodo bird." If one has a stool the right height and there is room under the board for the knee and legs, ironing is a pleasure. Try out this comfort before buying a new iron. Dad can keep his neckties looking new if there is a necktie iron in the house. This contraption presses the lining, raising the nap, and steams and presses the outside.

GOOD RECIPES

When winter knocks at the door it certainly whets the appetites of the family, and they desire more food. The body requires more energy, and therefore more fuel is needed to keep the body; however, overeating should be rigorously avoided, as it is undoubtedly one of the causes of the common cold, which takes up so much of our energy and time.

This month a fine recipe, that I highly appreciate, was sent in by a reader. I hope more of my readers will follow her example and send me their favorite recipes. Address Mrs. Margaret Stute, Box 1012, Fort Worth, Texas.

Mrs. Holcomb's Quick Graham Loaf

"I am sending you a 40-year-old recipe," says Mrs. Lulu Holcomb, of Shattuck, Okla. "It is fine for supper or any hurried meal."

Two cups graham flour, 1 cup white flour, ½ cup molasses, sour milk and soda or sweet milk and baking powder, 2 well beaten eggs, 4 tablespoons melted shortening.

Sift the white flour and add to graham, then soda, or baking powder, and salt. Add milk to the flour mixtures, and the well-beaten eggs, then the molasses. Bake in a shallow loaf or muffin pan.

Scotch Scones

Two cups flour, 1 teaspoon salt, 5 teaspoons baking powder, 2 tablespoons sugar, 4 tablespoons shortening, 2 eggs, 1/3 cup milk.

Mix and sift flour, baking powder and 1 tablespoon sugar. Put in shortening or rub with the finger tips. Add the beaten eggs (reserving white for the top). Add milk and mix to a soft dough. Roll out on a slightly floured board to one-half inch thickness and cut in diamond-shaped pieces. Bake in a quick oven 10 to 15 minutes.

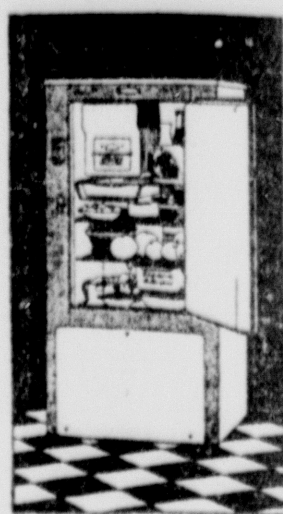

Raisin Rolls

Two cups flour, 5 teaspoons baking powder, 1 teaspoon salt, 2 tablespoons sugar, 3 tablespoons shortening, 2/3 cup milk, 1 tablespoon melted shortening, ½ cup raisins, ¼ cup chopped nuts, ¼ teaspoon cinnamon.

Mix and sift flour, baking powder, salt and 1 tablespoon sugar. Cut in shortening or rub with finger tips. Add milk gradually and mix into a soft dough. Roll out on a slightly floured board. Brush over with mixed shortening. Sprinkle with raisins, nuts, tablespoon sugar and the cinnamon. Roll like a jelly roll and cut in 3/4-inch slices. Put in a greased pan, cut side down and bake in a quick oven 15 minutes. Serve hot. Makes eight rolls.

See the newest 10-POINT Frigidaire

with the Quickcube Ice Tray... and 9 other outstanding advantages

Every feature that you would want has been combined in this new 10-POINT Frigidaire.

1—The Quickcube Ice Tray; 2—Porcelain-on-steel inside and outside; 3—Cabinet of striking beauty; 4—The new "Cold Control"; 5—The famous Hydrator; 6—Elevated food shelves; 7—Incredibly quiet operation; 8—Surplus power; 9—High speed freezing chamber; 10—Low operating cost.

Let us tell you about all these features—what they mean in greater convenience, greater satisfaction and greater value.

Thick, wavy hair!

You, too, can have long, soft, abundant hair. It's simply a matter of using this easy method; approved by hair-specialists; endorsed by stars of stage and screen; used by millions who haven't time for the more laborious treatments.

Tonight when you arrange your hair, just put a little Danderine on your brush. Then as you draw the bristles through your hair, see how the scalp is toned and soothed. See how the hair becomes softer, easier to manage; how its natural color is brought out; how it takes on new brilliance and lustre!

Danderine dissolves the crust of dandruff; helps stop falling hair; keeps hair and scalp healthy; encourages the growth of long, silky, abundant hair. Five million bottles used a year. That proves Danderine's effectiveness!

SKELTONS OF INDIAN MASSACRE FOUND

A few weeks since twelve skeletons were found by workmen working in a gravel pit ten miles northeast of Mesquite, in Dallas county. The skeletons were of both adult persons and infants.

It is believed by many that the skeletons are of white people killed by Indians at an early day. This theory is supported by the fact that the oldest citizens of the community do not recall that there was ever a cemetery at that point, and that people who die natural deaths are never buried in the position in which the skeletons were found.

The bones were found in three heaps, stacked one on the other, on a hillside from which gravel was being removed. Some of the bones were crumbling and turning to dust, but hardened when exposed to sunlight.

Prayer: Almighty God, we are not afraid with thee at hand to bless. Thou wilt never leave us nor forsake us. Grant us a steadfast faith in the closing hours of life.

CONDRON TELLS NEED WORLD WIDE INTEREST

UNITED STATES NO LONGER
ISOLATED NATION.

Efficiency in Industry Lacking in
Government; Distrust Found
Among Other Nations.

The International Service Committee of the Rotary Club had charge of the program Tuesday, with Tom Knighton in charge. S. H. Condron spoke on the international relations of America as they exist today. He considered that Armistice Day was a splendid day to consider our relations to the world, since Armistice Day affected the destinies of all nations.

Mr. Condron stated in beginning that while in Hall county last week he made a check of the 160 teachers attending the institute and found that one-half of them had been students at W. T. in Collingsworth county he found about forty percent of the teachers from W. T. This shows the extent of influence the College is having on the schools of North-west Texas.

In discussing the world attitude of the United States, Mr. Condron pointed out the change which has taken place since 1910. Before that date, citizens of this country had no world-wide interest. We were living apart, and had no interest outside of our country. The work of science has made the world very small. The war brought this country definitely into world wide affairs.

Mr. Condron stated that with the recognized industrial efficiency of the U. S., there was recognized national inefficiency so far as world problems were concerned. There is a shortage of thought as to these problems. There are too many who cry out "Let's pass a law," when passing law will do no good. It was suggested that were the leading thinkers marshaled, our problems would be solved.

The attitude of U. S. citizens has worked against the best interests of this country. We have belittled other nations, especially Mexico and Japan. We have said a lot of things which were unchristian and untrue. This has created distrust which works against our interest. Today we have things to sell, but when we go out to sell, we find a wall of indifference and resentment raised by our own attitude.

In national elections we fail to ask candidates their position on world-wide affairs, but elect congressmen, senators and presidents on local issues. Our histories and school courses are based on national pride, rather than upon facts. Years ago the English people recalled all textbooks and had them re-written to give a true picture of world affairs, no matter how it affected that country. As a result, a young Englishman has a comprehensive idea of world-wide affairs.

The war left some of the engaged nations with as high as 70 percent of their wealth pledged for their debts; while the United States has only 5 percent. The present depression could be solved in a very short while if our leaders would get together and work the thing out with a world-wide vision.

To give a concrete example of the attitude held by other nations toward the United States, before the war many nations in remodeling their governments made this country their model. Since the war seventeen nations have completely remodeled their governments and not a single one has copied that of the United States.

R. H. Berryhill W. T. Pianist, to Present Program

Mr. Robert H. Berryhill, head of the piano department of W. T. will present a program at the college assembly Tuesday morning, November 18, at 11 o'clock. The program will be a very entertaining one and will contain a number of difficult selections. The people of Canyon are invited to attend.

The program will be as follows:
Mozart—Pastorale Varie
Scriabin—Pastorale
Scriabin—Capriccio

Godowsky—Avowal
Rachmaninoff—Lilacs
Beethoven—Turkish March

Chopin—Valse in G flat
Chopin—Etude in G flat
Chopin—Ballade in G minor

Pictures of Palo Duro Bring Much Praise to Davis

Ray V. Davis, local photographer, presented a beautiful hand-colored picture made in the Palo Duro canyon to Mary Garden, prima donna, on her recent visit to Amarillo. It was announced by Miss Garden that she would take the picture to her place in Monto Carlo to be placed with her collection of pictures from all parts of the world. She highly praised the work as well as the beauty of the Palo Duro canyons.

The pictures of the canyons which have been widely exhibited and have brought much praise from many people upon the beauty of the canyons. Mrs. Phebe K. Warner, noted woman writer and secretary of the State Park Board recently wrote Mr. Davis commending his work in advertising the canyons by distributing his pictures made in the Palo Duro.

A display of the pictures was held at a furniture store in Amarillo last week.

Herd to Meet Lumberjacks Here in Saturday Go

A football game at Buffalo Stadium Saturday afternoon will mark the turning point for the Buffaloes in the race for the T. I. A. A. crown when they meet the Stephen F. Austin Lumberjacks in a conference game.

If the Buffs win after taking such a smashing defeat from the hands of the Roswell cadets last week they may still be classed in the running for the T. I. A. A. title, as they now stand third with Denton and Sam Houston at the top. The Buffs have two more conference games scheduled before the close of the current season.

The Buffaloes will meet the McMurry Indians at Buffalo Stadium on Thanksgiving Day for the final game of the season and the last conference game of the year. Providing the Buffs can win both games remaining on the conference schedule and both Denton and Sam Houston lose one game each before the season closes they will win the football crown for the first time in the history of the college. Should the Buffaloes lose Saturday's game with Stephen F. Austin they lose all hopes of coming into possession of the title for 1930.

Reports from the Herd's camp this week indicate that Coach Claude Reeds is pushing his men through the grind this week in an endeavor to blot out the most smashing defeat suffered at Roswell, by winning the three remaining games of the season.

The Buffaloes will meet the Simmons University Cowboys at Amarillo on November 22.

Eagles Bow to Lowly Dimmitt High Eleven 9-0

The Canyon High School Eagles suffered their first conference defeat at the hands of the Dimmitt High School eleven yesterday afternoon by a score of 9 to 0, and were thereby eliminated from the running in this section of District One.

It had been announced following the Canyon victory over Tulia last Friday that the Eagles had won the title to Section C of Class B high schools in District One and would meet Claude High School on Saturday to compete for honors of playing Dalhart for the District One honors.

Wednesday the Interscholastic League district committee announced that Canyon must play one more conference game before playing Claude, so hasty arrangements were made for a game Wednesday afternoon. It is stated that Tulia will play Claude for the honors to meet Dalhart, as that team has lost only one conference game and that was to Canyon.

Many Attend Legion Program in Amarillo

Large groups of Canyon people and students of the college attended the Armistice Day program given by the American Legion in Amarillo, Tuesday. The Amarillo Legion was assisted by several legion posts in the Panhandle including the Canyon organization, in staging the big celebration.

Practically all of the business firms of Canyon were closed for at least a part of the day Tuesday, in commemoration of the twelfth signing of the Armistice.

WHITTENBURG FUNERAL HELD HERE TUESDAY

MRS. GEORGE WHITTENBURG
DIED AT MINERAL WELLS.

Services Conducted by Rev. Gates
at Family Home Tuesday
Afternoon 3 O'clock.

Funeral rites for Mrs. George A. Whittenburg, 49, were held at the family home on Nineteenth Street, at 3 o'clock Tuesday afternoon. Mrs. Whittenburg, who died at Mineral Wells early Monday morning, following a long illness, has been a leading figure in the Panhandle section for the past 30 years.

The services were conducted by Rev. G. L. Yates, pastor of the First Baptist Church in Amarillo, who has been a close personal friend of the deceased and members of her family throughout the past several years.

She is survived by her husband, George A. Whittenburg of this city; her mother, Mrs. Nancy M. Archer of Amarillo; five sons, J. A. Whittenburg of Amarillo; and John Jake, Roy R. F. C., and Joe D. Whittenburg, all of Canyon; eight daughters, Mrs. H. L. Ratliff of Plemons; Mrs. B. G. Walker of Boise City, Okla.; Mrs. R. G. Windsor of Stinnett, and Georgia, Mattie Pearl, Bonnie Rhea, Helen and Tennessee Whittenburg, all of this city; two sisters, Mrs. Lewis Karr and Mrs. Claude Sheets, both of Spearman; seven brothers, S. B. and Frank Archer of Amarillo; R. B. and Ben Archer of Spearman; Otis Archer of Canyon; J. Dan Archer of Canadian, and Roy Archer of Austin.

Mrs. Lillie Frances Archer Whittenburg was born in Bell county, Texas, on February 22, 1881. Her parents were Mr. and Mrs. John M. Archer. She went to Hutchinson county in 1900, and in April, 1901, she married George A. Whittenburg, son of J. A. Whittenburg, now of Amarillo.

Active pallbearers were Dick Ware, Mack Sanford, L. F. Sheffy, W. J. Saunders, John Fry, W. C. Black, George Simms and Ed Deal. Honorary pallbearers were Tol Ware, Arthur Ware, Charley Ware, Charles Fisk, Ray Wheatley, W. T. Coble, Sam Isaacs, Jake Isaacs, J. T. Brindard, Archie King, M. T. Johnson, Bunk Harvey, D. A. Shirley, O. P. Jones, J. A. Hill, Clyde W. Warwick, Dr. R. T. Gist, Dr. Edward Yeager, Capt. Neal Hall, Frank Paul, W. H. Fuqua, Fancher Upshaw, T. C. Thompson, Ford Brandenburg, W. A. Johnson, and A. F. McQuiddy.

Interment was at Dreamland Cemetery under the direction of the Griggs-Thompson Funeral home.

The thousands of friends of the sorrowing family express to the bereaved ones their heart-felt sympathy in the hour of their great sorrow.

Henry Bradford returned Tuesday from Mineral Wells where he has spent two weeks.

Red Cross Roll Call Started in the County Monday

The annual Red Cross Roll Call started Monday of this week.

Committees visited all of the business houses, giving each person a personal invitation to join the Red Cross for the coming year.

Reports are not complete on the canvas of the city. Committees are at work in each school district of the county.

Every employee of the Thompson Hardware Co. joined the Red Cross of this year, making this the largest 100 percent business house in the city.

Wheat Damaging Worms Studied by Entomologist

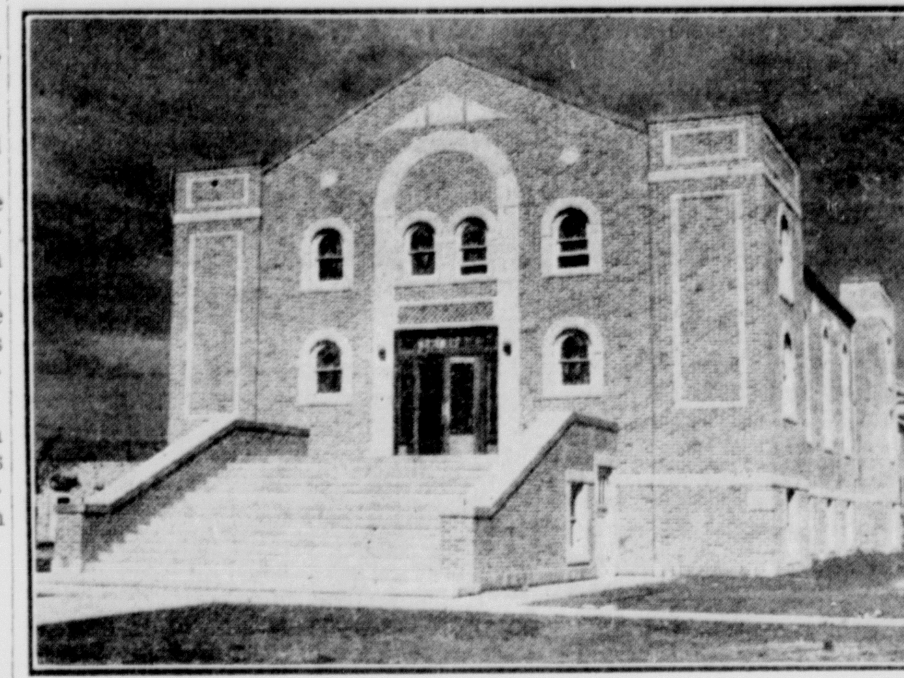

S. E. Jones, entomologist of the Texas Experiment Station, was in Randall county several days of last week, making an extensive study of the damage to the wheat crop by the wire worm and other insects. Although he is studying all of the worms which are causing damage to the wheat of the Panhandle, Mr. Jones is giving particular attention to the wire worm. It is hoped that he will be able to work out a successful control for the worms which are causing much damage over the entire Panhandle.

W. H. Upchurch, county agent, who accompanied Mr. Jones in his visit to Randall county wheat farms, declares that they found a heavy infestation of the wheat straw worm which has not heretofore been found in this section. From just an observation of the damage of the wire worm, Mr. Jones stated that he found them to be more plentiful and the damage more extensive on land where wheat had followed wheat and other small grain than on land where wheat had followed other crops.

An interesting discovery made by Mr. Jones, in a few simple experiments, was that the use of common treatments used for killing worms affecting wheat apparently had no effect upon the damage done by the wire worms. The wire worms were found to be eating both the seed and the growing stalk of wheat. Some of the fields in this county have become so badly infected with the worms that it has been necessary to replant the fields already.

Mr. Jones carried away with him a very large collection of all kinds of worms found in this section, especially those in the wheat fields. He hopes to be able to reveal some important facts to be used in combating the worms. Mr. Upchurch states that at this time an appropriation is badly needed for use in the study of worms causing damage to the wheat fields of the Panhandle. He states that Mr. Jones began his study of the wire worm regarding its activity in the cotton fields of central Texas but soon discovered that it was primarily a wheat damaging insect.

New Christian Church Dedicated Sunday

Dedication of the new Christian Church was held Sunday with appropriate services, conducted by Dr. Arthur Long of Fort Worth. The new church building is one of the most complete in the city.

Armistice Service Held Sunday Night College Auditorium

Sunday night the churches of Canyon united in an Armistice Day service which was held in the college auditorium at 7:30, the Rev. Arthur Long, who conducted the dedicatory services of the new First Christian church Sunday morning preaching the sermon, on "Reserves of Victory."

Music for the service was furnished by the united choirs of the Canyon churches under the Rev. H. A. Shaw of Amarillo as leader. The Rev. Mr. Shaw is the song leader of the First Christian church in Amarillo. Additional musical numbers were a solo by Dr. Grant McColley, accompanied by Mrs. McColley, and a solo by the Rev. Mr. Shaw.

The Rev. Mr. Jameson of the First Methodist church of Canyon gave the invocation. The order of services was in charge of the Rev. Mr. Kunze of the First Presbyterian church of Canyon.

Four color guards, members of the American Legion of Canyon, W. E. Lockhart, Allen Farlow, Harry Brown and Bob Price, sat on the platform in full uniform throughout the service.

Capt. Kirk Inspects Rifle Range Co. F.

Capt. R. J. Kirk, Jr., of Fort Worth was here last week and inspected the rifle range of Company F. His purpose in coming here for the inspection was to make recommendations to headquarters that the rifle range be enlarged, according to Lieut. C. B. Sheppard of Company F.

It is stated that Capt. Kirk made recommendations for the increase of the rifle range, which is located on the Burgess farm, northwest of Canyon, to be increased from two targets to five targets. It is expected that this will be done within the next few months.

Four of County Schools Seek Aid From State Dept.

Four of Randall county's rural schools are seeking school aid from the State Department of Education, according to County Judge B. F. Fronabarger. The sums asked for are only small amounts he states.

The districts making the requests for aid are: Sunny Hill, district No. 9; Stone, district No. 20; Palo Duro, district No. 25; Garrison, district No. 17, and Pierce, district No. 26. The State inspector has not visited the various schools so far this year, Judge Fronabarger said. However, he is expected to be in this county within the next few weeks, as he has visited schools in the Panhandle within the past few weeks.

Fritz Kreisler Will Come to Amarillo Friday, Nov. 21st

A signal opportunity for the people of the Panhandle to hear the world's greatest violinist is presented in the appearance in Amarillo next Friday, November 21, of Fritz Kreisler. Pre-eminently above all contemporaries, Kreisler's mastery of his instrument coupled with his ability to please and hold even those of his audiences who lay no claim to musical expertness, have made this magnetic performer the outstanding violinist of our time. To hear Kreisler once is to desire to hear him again and again and each return engagement brings together increasing numbers of his admirers in a constantly widening circle.

To musical connoisseurs and critics, his art has an irresistible appeal and they, one and all, pay ardent tribute to his wonderful interpretations of the masters of the musical world. But equally devoted to his sympathetic genius is the general public which listens only to what pleases its taste. No musician in history has captivated the public as has Fritz Kreisler and his remarkable popularity fills auditoriums to the doors wherever he appears.

Friday, November 21st, will be a great day for Amarillo and the Panhandle and every seat in the municipal auditorium should be filled to greet this wonderful artist. Prices for single tickets range from \$1.50 to \$3.00 and season tickets good for the remaining six programs of the Artists' Course sponsored by Emil F. Myers of the Amarillo College of Music, may be had at from \$5.00 to \$11.50. Out of town orders for reservations should be sent as soon as possible to Mr. Myers.

Oil Stove Fire Does \$75 Damage

The Fire Department answered a call to the K. A. Britt home in 1900 block on Seventh Avenue on last Thursday. The house was occupied by College students. The estimated loss from the fire which was caused by an oil stove explosion, was set at \$75.00. The damage was confined mainly to the walls of one or two rooms, the paper and canvas of which were burned.

Mrs. J. T. Burnett and Mr. and Mrs. Levi Cole spent the week end at the F. C. Cole home in Lockney.

Mrs. M. E. Rhoads, M. E. Jr., Mrs. John Guthrie and Mrs. Levi Cole were in Amarillo Thursday.

DEDICATE NEW CHURCH SUNDAY WITH SERVICES

REV. ARTHUR LONG DELIVERS
SERMONS SUNDAY.

Large Crowds Present at Services
Both Morning and Afternoon;
Ladies Served Lunch.

Dedicatory services for the new First Christian Church were conducted Sunday morning and Sunday afternoon under the direction of Rev. Arthur Long, State Secretary for the Texas Christian Churches.

The auditorium and balcony were filled at both the morning and afternoon services, attended by both members of the local church and of other churches in the city, as well as visitors from surrounding towns and cities. Large delegations were present from Hereford and Amarillo.

Rev. Long filled the pulpit Sunday morning, using as his subject, "Dedicating the Every Member Church." Song services were led by Uncle Tommie Clark. Mrs. Lee Clark of Plainview rendered a special solo for the occasion.

Rev. Long declared in his morning service that the real dedication of a church meant the dedication of the church members, pointing out that Paul referred to the church as a body. He stated that the advancement and work of the church depended wholly upon the members themselves.

Following the morning services lunch was served, cafeteria style, in the basement of the church by the members of the Ladies' organization of the church.

In the afternoon, Dr. Long used as his subject, "Now Carry It Through." Following this keys to the church were formally presented by O. A. Neely, contractor for the erection of the building. The keys were presented to D. A. Shirley, chairman of the building committee, who formally accepted them.

A drive for funds to be used in immediately clearing up outstanding bills, incurred in connection with final work in completing the building was staged Sunday, and resulted in obtaining practically \$2,000 for this purpose.

The erection of the church building was under the supervision of Rev. A. K. Scott of the Texas Christian Missionary Society who came to Canyon about ten months ago for the purpose of assisting in building the new structure. Rev. Scott has acted in the capacity of temporary pastor. The edifice is complete and modern in every respect and is one of the most beautiful small church structures in the entire Panhandle.

Another Free Show to be Held For Trades Day

The Canyon Chamber of Commerce will sponsor another free picture show on the regular monthly Trades Day, it has been announced by L. N. George, secretary of the organization.

The free picture given on the October Trades Day was well received and enjoyed by the hundreds who came to Canyon that day.

Trades Day for November will be held Monday, November 24.

HOLMAN PRAISES RANDALL COUNTY DAIRY ASSOCIATION

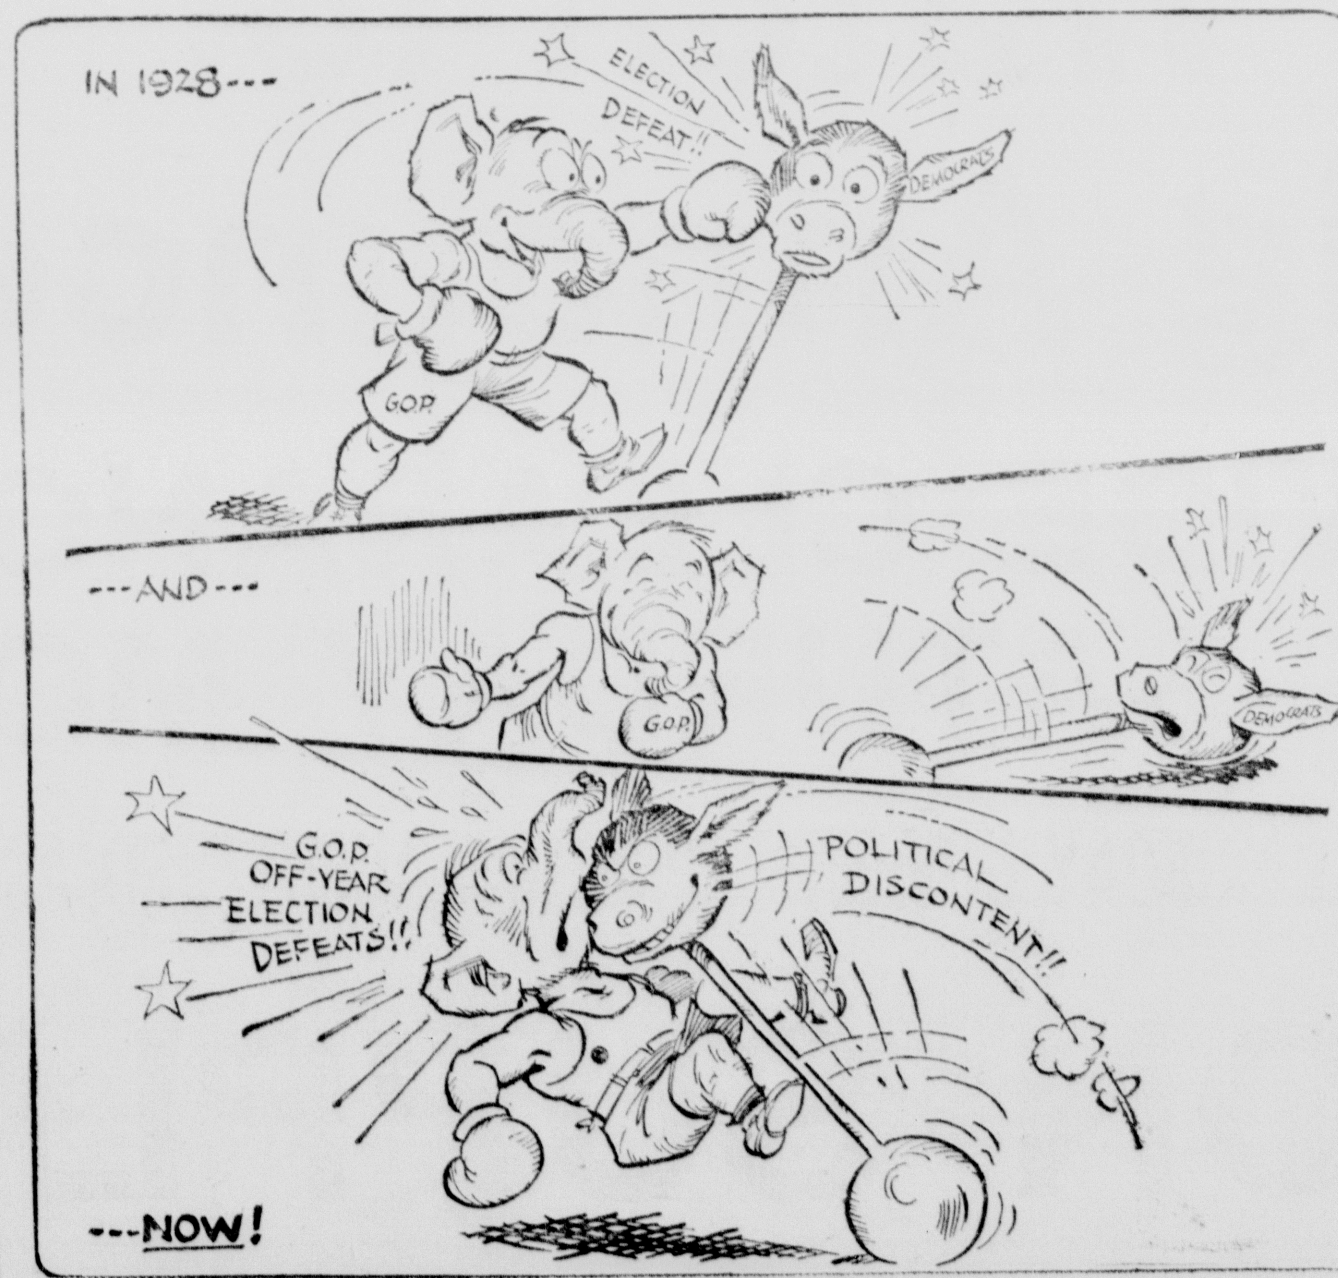

Seth B. Holman, new farm editor of the Amarillo News-Globe, was in Canyon last Tuesday night and was a guest of the Randall County Dairymen's association which met at the court house. In a letter to County Agent W. H. Upchurch a few days ago, he expressed surprise at the strength of the association and remarked that it was the most active and business like organization among farmers or dairymen that he had ever visited.

Mr. Holman was for a number of years publisher of the Hereford Brand, and recently served as editor of the Southwest Stockman-Farmer. A number of years ago he was connected with the Extension Service at A. & M. College. He will conduct the annual News-Globe Master Dairy Farmers Contest for 1931.

Mr. and Mrs. G. D. Foster of Colorado, and Mr. and Mrs. Paul Foster and children of Hereford spent Sunday at the parental G. D. Foster home.

Rev. H. A. Stroebel pastor of the Lutheran Church, returned Monday from the Panhandle conference of the Lutheran church held at Wilson.

RANDALL IN LEAD.

Time was that Randall county was considered by the outside world as a rather poor agricultural county, largely because the Palo Duro and Tierra Blanca canyons traversed this county.

What a change has taken place. Randall county is today recognized as the leading agricultural county of the Panhandle. Men who knew the agricultural value of the county have convinced the world that this county is a leader in many fields of endeavor.

As a cattle country, a few years ago, Randall hung up some enviable records, including several world championships. With the passing of the cattle business on the gigantic scale, this county turned to scientific agriculture on the same scale as it was engaged in the cattle business. The plow followed the big herd, and the recent census shows that there are 865 farms in this county, with the number growing rapidly.

For this year, Randall county stands at the head of all counties at the three major shows—the Fort Worth Fat Stock Show; the Tri-State Fair; and the Dallas State Fair.

Randall county is the home of the Master Dairyman of Northwest Texas, and two other dairymen are rated in third and ninth places in the growing dairy section.

The finest Duroc Jersey hog farm in the entire Northwest Texas is located in Randall county.

Individual faith in this section and farsighted farmers, working with an efficient and energetic county agent have established the real worth of Randall county as an agricultural county.

Hats off to the farmers, who are doing so much to improve this fine county.

A new day is seen in Texas when five constitutional amendments are adopted in one election. It is almost a miracle. The secret of success of this election was in the fact that different people were working on all five amendments, and consequently each group was in sympathy with the other group and the other amendments. Furthermore, a systematic effort was made in this election to see to it that the voters were informed as to the merits of the various amendments. Heretofore amendments were presented, and the voters allowed to draw their own conclusions as to the merits of the proposals. As a result, too many voters went to the polls and voted against all proposed changes in the state constitution without regard to the merits, and unfortunately too often without really understanding the merits of the proposals. Other changes are needed in the state constitution. In fact, it would be a good thing to re-write

this document in order to bring it down to the present day needs.

A lot of explaining is being done by political writers regarding the Democratic landslide in the general election of last Tuesday. The wets claim that prohibition had everything to do with it, and that the country is ready to drop prohibition from the constitution. The dries claim that the economic depression, and the revolt against the so-called Hoover prosperity and the unjust tariff had everything to do with it. All of these elements had a lot to do. The party in power always bears the consequences when conditions are bad. There is always a general revolt against the ins when things go wrong. The funny thing, however, is that these revolts against the Republicans usually take place on the years when a president is not up for election. The Republicans see to that.

It seems that the voters of Illinois preferred a Democrat to a Republican for their U. S. senator. The Republican candidate, Mrs. Ruth Hanna McCormack, spent more than \$250,000 to secure the Republican nomination, which fact no doubt caused her to lose the support of some in the general election. There are others who will not support a woman for high office, and that had some weight. The prohibition question entered, with the woman sponsoring the cause of the dries, while the Democratic candidate was a rabid wet. Chicago is noted for its wetness. All in all, the woman had a hard hurdle ahead when she entered the general election, and with the general opposition to the Hoover administration, there is no wonder that she was badly defeated.

This depression business works in circles. The public refuses to buy, or at least that part of it which is able to buy. This stops the factory, and the workman is thrown out of a job; the factory worker has no money to spend, and hence he cannot buy food, and the manufacturer cannot buy raw materials—therefore, the producer has his raw material which no one is able to buy. The railroad have nothing to haul from the farm to the factory, and nothing to haul from the factory to the merchant, therefore it lays off its men. Thus it goes in circles. Those who have the money should buy what they need, and buy it now.

The wets are now talking about the next Democratic nominee as coming from their crowd. Franklin Roosevelt, governor of New York, will be named by the wets, and commands a static position in national politics owing to his unprecedented victory in the Empire State. Political maneuvering during the coming two years are going to be interesting. If the wets succeed in nominating their man, as in 1928, there will no doubt be another revolt in the dry South.

Texas sheriffs advise the people to stop picking up hikers along the highways. Too many people have been killed and robbed by these innocent looking hitch-hikers. It may seem a little cruel but it is the safest plan to refuse to pick up fellows along the highways whom you do not know.

Do your shopping in Canyon.

News in Canyon 25 Years Ago

(From the files of the Canyon City News, November 10, 1905)

Mrs. S. B. Lofton returned from her visit East on Sunday.

W. F. King left Monday to visit his brother in Erath county, and to see the State Fair.

Married in town Monday, R. E. Brooks of Swisher county and Miss Pairlee Mayo of Ceta, this county.

Born to Mr. and Mrs. C. T. Word, Saturday morning, a son.

Born to Mr. and Mrs. Ralph Rusk of Ceta, November 1st, a daughter.

T. H. Rowan has purchased from L. T. Lester the property on the corner including the livery stable he now occupies and the Canyon Coal Co. house and wagon yards.

W. R. Redfearn is having the partition taken out of his racket store and having the whole thing repapered, preparatory to moving in a stock of holiday and Christmas goods.

Miss Ollie Scott of Corsicana is here visiting her friend, Mrs. J. Harrison.

Mrs. Oscar Hunt returned from Mineral Wells last Friday.

J. D. Gamble came in last week and is at his old quarters, the Canyon City Supply Co., as manager of the business.

Going to attend the tenth convention of the Texas Branch of the American Association of College Registrars to be held at A. and M. College, College Station, November 14-15, D. A. Shirley, registrar of W. T. leaves Canyon Thursday morning.

The convention opens Thursday evening at 8 o'clock with pre-registration procedures and an informal reception in the Asbury Room of the Library at A. and M. The formal opening will be Friday morning, with E. J. Howell, of A. and M. presiding. The invocation will be in charge of the Rev. Norman Anderson, Presbyterian student pastor of A. and M. College.

Friday afternoon separate registration procedures for new and old students will be held, Miss Edna E. Phillips, of Stephen F. Austin State Teachers College being in charge of the first group, and Mr. Shirley in charge of the second.

At 7 o'clock Friday evening the members of the Association will be entertained at a banquet in Sbis Hall Annex.

Sectionalizing, schedule changes, reports of the national meeting held in Memphis, Tenn., April 15-17, 1930, questions, and a final business session will be held Saturday, adjournment taking place at 2:30 at which time a football game between A. and M. and Rice Institute at Houston will be played at College Station.

Mr. Shirley expects to return from the convention Sunday night.

Milwaukee brewers, anticipating the return of beer, have already installed manufacturing apparatus. So they'll be first, perhaps, to respond to taps.

Leaving Wednesday and returning Saturday morning, President J. A. Hill attended the third session of the Texas Education Commission which was held the 6th, 7th, and 8th at Fort Worth.

The Texas Education Commission is a group created by the State Teachers Association, and is composed of about seventy people, representing not only the Association but the State Board of Education, institutions of higher learning, the Regional Chamber of Commerce, and various state organizations of women's clubs. Its purpose is to make a careful study of the educational problems in Texas, and to make recommendations to the state legislature regarding them.

The questions discussed at the meeting in Fort Worth last week covered a wide field. "Standards and Certification of Teachers" was stated and the discussion led by

HILL ATTENDS MEETING HELD AT FORT WORTH

TEXAS EDUCATION COMMISSION DISCUSSES MANY PROBLEMS.

Leaving Wednesday and returning Saturday morning, President J. A. Hill attended the third session of the Texas Education Commission which was held the 6th, 7th, and 8th at Fort Worth.

The Texas Education Commission is a group created by the State Teachers Association, and is composed of about seventy people, representing not only the Association but the State Board of Education, institutions of higher learning, the Regional Chamber of Commerce, and various state organizations of women's clubs. Its purpose is to make a careful study of the educational problems in Texas, and to make recommendations to the state legislature regarding them.

The questions discussed at the meeting in Fort Worth last week covered a wide field. "Standards and Certification of Teachers" was stated and the discussion led by

MRS. W. T. SIMMONS HOSTESS TO LOYAL DOZEN

Members of the Loyal Dozen club were delightfully entertained at the home of Mrs. W. T. Simmons last Friday afternoon. The afternoon was enjoyably spent in doing needlework. A delectable dessert course was served at the refreshment hour.

Those present included the following: Mrs. N. T. Dickerson, Mrs. C. C. Morton, Mrs. V. L. Briscoe, Mrs. Jay Prichard, Mrs. Clifton Duke, Mrs. Noel Beckett, Mrs. Fred E. Wortham, Mrs. G. H. Nollner and Mrs. L. R. Johnson.

The club will meet tomorrow at the home of Mrs. Fred Wortham with Mrs. Wortham as hostess.

JOLI MARDI MEETS AT DUKE HOME THURSDAY.

A profusion of autumn flowers adorned the entertaining rooms at the home of Mrs. Clifton Duke when she was hostess at the regular meeting of the Joli Mardi club last Thursday afternoon. Following an afternoon of bridge a delicious salad course was served at the tea hour.

Seated were: Mrs. Jasper Atkins, Mrs. V. L. Briscoe, Mrs. Clyde Johnston, Mrs. W. T. Simmons, Mrs. L. R. Johnson, Mrs. Eddie Smith, Miss Frances Usery and the hostess.

Mrs. Vincent Shuman and Mrs. J. B. Fowler were callers in Amarillo Saturday.

KLEINSCHMIDT THANKS ALL FOR CO-OPERATION NOV. 2

In an open letter to The News, J. W. Kleinschmidt, president of the Canyon Chamber of Commerce offers the thanks of the organization for the co-operation extended in holding the open park day, Sunday, November 2. His letter follows:

"Realizing that it was through the efforts of the following organizations that the Park Day was a success, we wish to express to them our thanks, and also we want to let them know that we are deeply indebted to them for their help:

"The State Highway officers, who so ably handled the motorcade; the members of Company F, who assisted in handling the throng of people; the Canyon citizens, who assisted in various ways; the doctors, who were on duty in case of accident; the Boy Scouts; the teachers in the College who furnished transportation; the Chambers of Commerce over West Texas; the press which so graciously advertised the day for us; and last but not least, we wish to thank Mr. Fred Emery, Joe Gamble and Mr. Roach for allowing us the privilege of passing over their grass lands.

"Yours for a Playground for all West Texas.

J. W. KLEINSCHMIDT,
"President Canyon Chamber of Commerce."

Osgood Addresses Hereford Bayview Study Club Thurs.

Called upon to talk to them for the third time within the year, Mr. L. A. Osgood, of the English department went to Hereford Thursday afternoon to address the regular meeting of the Bay View Study Club of that town. His subject was "Our English Tour as a Background for the Appreciation of the English Novel," basing his remarks on the trip which he and Mrs. Osgood took during the past summer through England, and the British Isles.

Mr. Osgood spoke for an hour and a half, having extended his talk one-half hour at the special request of the audience. Among those who heard the speech were a number of W. T. ex-students.

Every boy should be taught that if he keeps his hands in his pockets he will never have much of anything else in them.

Legionnaires, Ex-Service Men Are Feted By Auxiliary Monday Evening

Reminiscences of 1918 were brought to mind when the members of the American Legion Auxiliary banqueted the Legionnaires and ex-service men of this county at the Legion Home Monday evening.

Patriotic colors were developed with bunting, and flags to form an attractive environment for the tables. A miniature doughboy surrounded with poppies centered the banquet board and plate favors of poppies were presented each guest.

Post Commander W. E. Lockhart acted as toastmaster, and Mrs. H. A. Brown gave the address of welcome for Auxiliary members. Invocation was given by John S. Humphreys. An interesting feature of the evening were the talks given by officers of the local Legion Post telling where they were stationed when the armistice was signed and something of their reactions at the declaration of peace. Those who spoke were: Hubert O. Price, Dr. Harry Brown, J. Wesley Kleinschmidt, J. B. Fowler, Bart Johnson, T. H. Knighton and G. A. Farlow.

Clyde W. Warwick gave a short talk thanking the Auxiliary members in behalf of the guest organizations. Mr. Warwick and Mr. Humphreys were special guests of the occasion.

Songs popular in the days of the war were sung with hearty fervor, and evoked vivid memories of bygone days.

Mrs. G. A. Farlow and Mrs. T. H. McDonald were in charge of the decorations for the evening. The committee on serving included the following: Mrs. T. H. Knighton, president of the Auxiliary; Mrs. H. O. Price, Mrs. R. E. Ball, Mrs. Berl Mayfield, Mrs. J. S. Humphreys and Mrs. Mack Gillham. Sixty-eight were seated at the banquet.

CANYON REBEKAHS VISIT IN TULIA

The members of the Canyon Rebekah Lodge, No. 350 enjoyed a meeting with the Tulia Rebekah Lodge last Wednesday evening. At the close of the business delicious refreshments were served those present.

The visitors from Canyon were: Mrs. Nannie Myers, Mrs. Pinkie McBride, Mrs. Marie Hair, Mrs. Lucy Brown, Mrs. Ruby Tanner, Mrs. Dorothy Taylor, Mrs. Gertrude Trowbridge, Mrs. Bertie Strain, Mrs. Ida Johnson, Mrs. Winnie Gibbs, Miss Columbia Redfern and Mr. Glen McGahey.

Ms. John Hegl of Petersburg is visiting this week with her granddaughter, Miss Evelyn Gregory, and in the home of Mrs. M. E. Collier.

MRS. GEORGE F. WOOD ENTERTAINS SATURDAY

Mrs. George F. Wood entertained a number of her friends with a delightful affair at the home of Mr. and Mrs. L. A. Osgood last Saturday evening. Autumn colors were attractively carried out with seasonal flowers in the rooms where five tables were placed for bridge, and were repeated in the table accessories and refreshment course.

Seated were for the games were: Mr. and Mrs. John Humphreys, Mr. and Mrs. C. Wesley Batchelder, Miss Jennie C. Ritchie, Miss Mattie Swayne, Miss Novella Goodman, Miss Jean Moore, Miss Mary Adaline Lamb, Miss Alice Dawes, Miss Darthula Walker, Miss Hattie M. Anderson, Miss Marian Normington, Miss Anna I. Hibbets, Miss Mary Morgan Brown, Miss Helen White Moore, Mrs. B. A. Stafford, Mrs. Laura Saunders, and William R. Dawes.

REUNION AT GREENFIELD HOME HERE SUNDAY

The home of Mr. and Mrs. J. E. Greenfield was the scene of an enjoyable family reunion Sunday when their children and grandchildren assembled for a real visit. A delicious dinner was served at the noon hour.

Those present were: Mr. and Mrs. J. E. Greenfield and daughters, Misses Ruth, Armer Lee and Billie Louise of Canyon; Mr. and Mrs. J. Madison Daugherty of Canyon; Mr. and Mrs. Ted Schuler and children, Ted, Jr. and Norma Jean of Petersburg; Mr. and Mrs. Verna Greenfield of Post; Mr. and Mrs. Ira Greenfield of Post.

MRS. CONEWAY OF HEREFORD IN HONOREE AT PARTY

Mrs. Ray Coneway of Hereford was the special guest of honor at a lovely surprise birthday dinner given Tuesday evening at the home of Mr. and Mrs. L. N. George, 1303 Fourth Avenue.

Pink and white chrysanthemums and pink tapers were used as table decorations and a color scheme of yellow and white was carried out in the living room decorations.

A four-course dinner was served after which several games of forty-two were enjoyed. High score awards were presented Mrs. Coneway and Mr. T. M. Cleek. Tallies, favors, and place cards emblematic of Armistice Day were used.

Covers were marked for the following guests: Mr. and Mrs. Ray Coneway, Mr. and Mrs. J. E. Beyer, Mr. and Mrs. Alvin Thompson, Mr. and Mrs. Jesse Stanford, Mrs. J. B. Jones and Paul Coneway, all of Hereford; Mr. and Mrs. T. M. Cleek of Panhandle, and Miss Alma McArthur of Brownwood. Byron George and the host and hostess, Mr. and Mrs. L. N. George.

Mr. and Mrs. Verna Greenfield returned Tuesday to their home in Post after a visit with Mr. and Mrs. J. E. Greenfield here the past week.

Flounce Styles Mark Latest Frocks

WITH SMART DRESSES DEVOID OF TRIMMING THIS WINTER, SKIRT AND COLLAR TREATMENT WILL COMMAND MOST ATTENTION, HARRIET SAYS

BY HARRIET

THE smart trick this winter, when there are so many extra accessories and lingerie touches everywhere, is to have one or two simple, elegant frocks with no trimming at all.

Flounces and collars are the two important parts of such costumes. Just as individually cut sleeves make or mar the semi-formal frock, so the right skirt treatment and the right collar cut make these wearable every day dresses.

Material and color play an important part, too. There is no gain-saying the psychological value of a red frock in an office of drably dressed men and women. There is no denying the lift in some pretty figured print, either.

The cowl collar is perhaps the most important single neckline this winter. It may be a one-sided cowl, it may be one that loops low to show lace. But the cowl collar that is cut just right, one that needs only its own soft fold to give it chic, is the right collar for an under-the-coat dress.

One of this type comes in the new wine-red. It is a restrained color but lively enough to be cheering. It is flat crepe and beautifully cut, with a perfect cowl collar and sleeves with cuffs fastened by link buttons.

The flounce portion of this dress is interesting. The skirt is gored and then pleated until just above the knees. Then, instead of pressing in the pleats, they are left unpressed, a much more graceful treatment. They flare all around in a soft, pretty way. With this dress a matching wine-red kid belt and wine-red kid shoes, of the new side lacing type, are admirable touches. They make the costume seem much more important than contrasting accessories would.

FOR the printed dress, polka dots still stand high in favor. A novel dress uses two kinds of polka dots to make a single dress, both in a soft crepe silk. The body of the dress is black, polka-dotted in white. The yoke, sleeves and flounce are of red, polka-dotted in white. The polka dot is the same size in both colors but the contrast of black ground colors makes the dress very interesting and unusual.

Here we have a new neckline. It is a dress cut with sleeves and yoke in one and the little standing up collar ties in front in a bow, right under the chin, but not tightly about the throat. It stands off in much the same manner as the stiff little Chinese collars, but has the softness of the bow added.

The flounce on this dress is a new note, too. It has French pleating, which is two folds of pleats within one, and give more fullness than straight pleating. The flounce is stitched down a couple of inches or so, after it is applied to the body of the dress. Then it is pressed so expertly that the skirt seems a straight line though it really is quite full and flaring when one walks in it.

Outstanding feature of the wine-red frock, left, is its interesting cowl collar and flounce. The flounce of the print dress, right, has two folds of pleats in one.

new note, too. It has French pleating, which is two folds of pleats within one, and give more fullness than straight pleating. The flounce is stitched down a couple of inches or so, after it is applied to the body of the dress. Then it is pressed so expertly that the skirt seems a straight line though it really is quite full and flaring when one walks in it.

Then it is pressed so expertly that the skirt seems a straight line though it really is quite full and flaring when one walks in it.

MISS WALKER HONORED WITH TEA WEDNESDAY

Complimenting Miss Darthula Walker who is leaving next month on a tour around the world with the Floating University, several of her friends entertained with a tea at the Kerr House Wednesday afternoon from 4 until 7 o'clock.

Miss Anna I. Hibbets, Miss Marian Normington, Miss Ruth Cross, Miss Hattie M. Anderson, and Mrs. Laura Saunders were the hostesses. Pink roses in a blue vase were a lovely center piece for the table and decorations of ships and dolls of foreign countries symbolic of Miss Walker's journey were used throughout the entertaining rooms.

Tea was served by Miss Mary E. Hudspeth, Miss Edna Graham, Miss Tennessee Malone, Miss Isabel Robinson and Mrs. L. F. Shetty, assisted by Miss Helen White Moore and Miss Mattie Swayne.

P. T. A. MEETING AT H. S. NEXT WEDNESDAY

There will be a meeting of the Parent Teachers Association at the Canyon High School auditorium next Wednesday, Nov. 19, at 4:15. This is the first meeting of the organization this year and a very interesting program is being arranged. Everyone is urged to attend.

At the last meeting in April the following names were submitted by the nominating committee: President, Mrs. L. A. Donnell; vice president, Mrs. R. McGee; secretary, Miss Stella Rusk; treasurer, Mrs. D. Mack Stewart; cor.-sec. Mrs. P. K. Brian; chairman of publicity, Mrs. Irby Carruth. Since Mrs. Donnell has resigned as president, the election of a new president will be taken up at the meeting Wednesday.

IBSEN'S PLAYS STUDIED AT CLUB MEETING

At the regular meeting of the Woman's Book Club in the club room at the court house Wednesday afternoon, the study of the plays of Henrik Ibsen was continued under the direction of Miss Agnes Meyers and Miss Edna Graham.

The club is at present engaged in the study and analysis of Norwegian Drama and the two plays "Pillars of Society" and "Ghosts" were the numbers discussed. An explanatory talk was given about each, followed by a comparison between the two and with other of Ibsen's plays.

MRS. MCCREERY HOSTESS TO KINGS DAUGHTERS

The Kings Daughters of the Baptist Sunday School met in the regular business and social meeting at the home of Mrs. J. W. McCreery Thursday, Nov. 6 at 3:00 o'clock.

Eight members and two visitors were present. At the close of the meeting the hostess served delicious refreshments, assisted by her daughters and Mrs. Baker.

MRS. FRIEZE, MRS. MOORE TALK AT STUDY CLUB

Mrs. Lige Frieze and Mrs. Claude Moore had charge of the program of the Junior Woman's Club Monday afternoon and each gave interesting discussions of modern highways in the United States.

The talk given by Mrs. Frieze was concerning Highway No. 11 which extends from Watertown, N. Y., to New Orleans. Highway No. 21 from Branchville, N. C., was the topic discussed by Mrs. Moore.

Mrs. Frieze, critic for the club, also gave an explanatory talk on parliamentary rules.

Those present included the following members: Mrs. M. L. Sadoris, Mrs. Levi Cole, Mrs. Tom Lair, Mrs. J. Madison Daugherty, Mrs. Claude Moore, Mrs. Joe Black, Mrs. Mitchel Jones, Mrs. Carl Scott, Mrs. Harry Wood, and one visitor, Mrs. J. A. Edwards, Jr.

MRS. GLEN COSTLY ENTERTAINS CLUB

The Las Senoras club was the inspiration for a lovely party given Wednesday afternoon at the home of Mrs. R. E. Ball with Mrs. Glen Costly as hostess.

Autumn flowers were observed throughout the living rooms where three tables were placed for the guests. At the conclusion of the games a delectable plate lunch with coffee was served.

Seated were: Mrs. Felix Neff, Mrs. Hud Prichard, Mrs. Claude Moore, Mrs. Jack Boutwell, Mrs. Carl Scott, Mrs. J. Madison Daugherty, Mrs. Harry Wood, Mrs. Jim Rose, Mrs. Mitchel Jones, and two special guests, Mrs. Eddie Smith and Mrs. N. E. McIntire.

CARD OF THANKS.

We wish to express our thanks for the great kindness and sympathy extended to us in the recent illness and loss by death of our dear wife and mother. We especially wish to express our appreciation for the many beautiful floral offerings. The thoughtfulness and sympathy of our friends and neighbors have done much to ease the sorrow in our hearts during this trying hour.

GEORGE A. WHITTENBURG AND CHILDREN

MRS. GRIFFITHS ILL.

Mrs. White Griffiths was taken Tuesday evening to Amarillo in an ambulance and from there to Fort Worth via train. She is now in the Harris Hospital at Fort Worth for special medical treatment, but no word was received today as to her condition.

Mr. and Mrs. Harry Wood visited in the parental Frank B. Wood home at Pampa Tuesday.

Soap sales are said to be on the increase in the country at large. No wonder the small boys are climbing trees and staying up there.

farmer apparently takes no stock in the argument that he will get better prices if he sows a smaller crop. The plea to put more of his acreage into other crops so he will have something to fall back on if wheat fails, seems to fall on deaf ears.

All these problems, of course, have to be worked out by the growers themselves. How much to plant, not only of wheat but of everything else, has always been a subject for argument among rural residents. You don't have to leave home to hear it; rural residents in nearly every community are divided on the subject. But somehow or other this question always seems to take care of itself. This year

we faced an over production in most everything, and nature came along with a drouth and leveled it to about what it ought to be. So this thing of trying to fix an exact acreage for wheat, corn, cotton, tobacco, or anything else that grows—looks like a waste of time. Give the grower of anything decent weather conditions and a fair break on the market and he'll solve his own problems.

If some men possessed clear titles to mansions in the skies the first thing they would do would be to mortgage them.

Why is it so hard for the law to find a fake stock promoter and so easy for the victim to find one?

11 Randall Farmers Enter Master Contest

Eleven Randall county dairy farmers have announced their intention of enrolling in the Annual Amarillo News-Globe Master Dairy Farmers Contest. Enrollment for entry into the contest closes November 15. The contest will come to an end next September with the names of the ten winners to be announced at the annual banquet held during the Tri-State Fair.

The men who are in the contest from this county at the present time are: Eric C. Allison, T. V. Slack, Tom Lair, H. B. Hales, H. R. Fulton, James E. Park and Son, C. C. Stewart, Albert Byars and Son, E. Gidden, Carl Fulton and L. J. Fulton.

County Agent W. H. Upchurch states that the number enrolled from this county has practically doubled each year. In 1919 there were three Randall county men in the contest; in 1930, there were six in the contest, one of whom was the winner of the contest and the other two placed third and ninth; and now for 1931 there are eleven.

THE GREAT AMERICAN HOME

CHURCH OF CHRIST

Our hearts were made to rejoice to see a greater number present for Bible Study last Lord's Day at the appointed hour of 9:45 a. m. We should not permit a few minutes of sleep to hinder us from being on time. You may have to exercise a little more faith to be there and we know you will respond.

Prayer meeting services are growing; 38 present last Wednesday. Why not attend and make this one of the most interesting services during this fall and winter? Every Christian should love to study the Bible and this is an ideal time.

Do you attend the worship because it is convenient and pleasant to you? If you are guilty of such action the spirit of Christ is lacking. Those who love the Lord, want to keep their appointments with the Lord every Lord's Day and do not feel right unless they do.

Regular announcements:
Bible Study—9:45 a. m.
Preaching—11:00 a. m.
Communion—11:45 a. m.
Young People—6:30 p. m.
Preaching—7:30 p. m.

Wednesday:
Ladies Bible Class—3:00 p. m.
Prayer meeting—7:30 p. m.

Let us go forward with greater zeal for the Lord's cause by attending every service. If you do not love the Lord enough to attend these services, do not attend to please me. For if you please men you do not please the Lord.

A most cordial place. All find a welcome here. All of us are on the job. Hope to see you regularly.
John O'Dowd, Minister.

FIRST CHRISTIAN CHURCH.

SELLING TO FARMERS

Business men of the country spend 850 million dollars a year for advertising to reach city dwellers, but only 30 million in reaching the farmers, according to Samuel R. McKelvie of the Federal Farm Board.

He added that this disproportion in advertising efforts was all the more striking when it is considered that the farmers of the country have a normal purchasing

Not All Police Have Big Feet!

On the Los Angeles police force not all policemen take orders from the higher up. Standing in the shadow of Patrolman Frank Jaynes, 6 feet 9 inches, is his "superior," Sergeant Jack Horrell, three feet. Sergeant Jack, wondering how to boss his canteen mauler, is son of a popular sergeant on the force.

power of ten billion dollars annually.

He might have gone further by stating that no class of prospective customers are more responsive to honest advertising than farmers and farmer's wives. Generally they take fewer newspapers and other periodicals than city dwellers, and consequently read those they do take more thoroughly.

Merchants would do well to give more consideration to newspapers which reach the rural population.

HOME PERILS

The home is a man's castle. But it is up to the owner and his family to see that personal comfort and safety are not jeopardized by hidden enemies within the castle itself. That is to say, if there is a dangerous stairway, it should be repaired at once. If you have reason to believe flies are not going to draw perfectly, or that they might cause a fire that would destroy your home, see to it that they are put in perfect shape at once. If the back steps are rickety, why wait until some member of the family breaks an arm before repairing them?

"Watch your step" holds just as good in the home as anywhere else. Figures show that there are as many accidents in homes as there are in factories or mines or on the railroads. Just because it is "home" does not mean that it is a perfectly safe place in which to be. You may be neglecting the very things that keep it from being safe. Why not take a look around and give home perils the attention they should have had long ago?

The first time a railroad engineer hits one of those midget cars he probably will figure there is sand in the engine's bearings.

THE EAGLE'S TALE

VOLUME NO. 5

CANYON, TEXAS, NOVEMBER 13, 1930.

NUMBER 9

Well folks, we licked Tulia, and I'm so happy and full of malts that I can't say too much.

Tulia treated us fair and square while we were there and comin' and goin'.

I hear we have to play Claude to get the section B District One Championship. Claude is now preparin' for a lickin'.

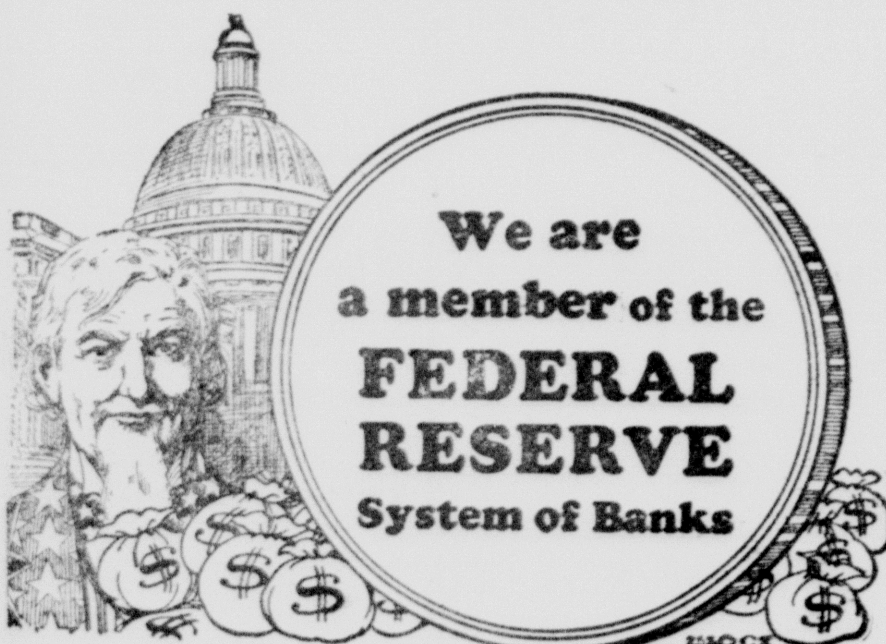

Night tennis is proving a great success in Milwaukee, and the fellow at the next desk thinks it is because of the brilliance of the matches.

Airmail pilots who are now asking for an increase in pay probably feel that the sky is the limit.

Will you have to start from the beginning again... and save and save for a home? Or will the fire insurance companies cheerfully and promptly assume all losses?

CANYON, TEXAS

CANYON ELEVEN CONQUERS TULIA HORNETS FOR RIGHT TO TRY FOR DISTRICT TITLE

Coach Edgar Brady's fighting Canyon High School Eagles completely upset the dope bucket and clawed their way to the top to score a sweet victory of 12-0 over the Tulia Hornets, at Reid Field, Tulia, last Friday afternoon to win the title to Section C of District one of Class B high schools in the interscholastic league. Apparently the Eagles had too much pep and action for the heavy Hornets who fell before the Eagle onslaught in the latter part of the game.

During the first half the teams played on more nearly even terms, but in the last half Canyon outplayed the Tulia eleven in every phase of the game. Every man on the Eagle squad played a good game, but the outstanding players had listed among them, the ones who have played a dependable game so far this season.

Wilkins played an outstanding game for Tulia. His best work was in punting and passing.

Canyon scored first early in the second half after carrying the ball to the shadow of the goal only to lose it after Wilkins kicked the ball out of bounds on his own 11 yard line, a pass, Strain to Wilkins placed the ball on the 2 yard line. On two line plays the ball was carried over the goal line by Strain. The Eagles failed on the try for extra point.

Following an intercepted pass by Wooten, on the Tulia 45 yard line, Tucker made a broken field run, after some neat side stepping, to carry the ball across the goal line for the second counter. After the try for extra point failed again, the score stood 12-0.

Canyon tried 12 passes and completed 7 for 55 yards, five were incomplete and 1 intercepted. They punted 12 times with an average of 22 yards. They took penalties amounting to 20 yards.

Tulia tried 6 passes, 2 complete for 25 yards, 4 incomplete and 2 intercepted. They punted twelve times for an average of 21 yards. They were penalized 20 yards.

The line-up:

Canyon	Position	Tulia
Wiggins	L. E.	Reddell
Elliston	L. T.	Ramsey
Miller	L. G.	Toone
Taylor	Center	Parker
Bell	R. G.	Rogers
Foster	R. T.	McFarling
Hardin	R. E.	Neale
Strain	Quarter	Wilkins
Pearson	L. H.	Evans
Tucker	R. H.	Speer

When finished the room will present a pleasing interior and will be decorated in the best of taste.

Clubs

Purple Peps

Members of the Pep Squad were surprised when told that they were going to Tulia. Cars had been provided to take the pep squad. They left at one-thirty o'clock and got there about two-forty-five. They were surprised to see that Tulia had a new football field.

More than half of the pep squad went. Although they did not give a stunt, they certainly supported the Eagles by yelling. The pep squad wishes to thank those that are not members of the pep squad that helped them yell Friday.

A portion of the bleachers, roped off with purple and white, was reserved for the Eagle backers.

During the half "T" and "C" were formed by the Hornet Poppers and pigeons with red and white and purple streamers were let loose.

Type High

The press club met last Tuesday for its regular meeting. A talk on "The Associated Press" was given by Vincent Lockhart.

"Newspaper Leads" was discussed by Miss Dickinson, faculty adviser of the Eagles Tale.

Requirements of membership on the Eagles Tale staff were discussed and decided upon.

El Circulo Castellano

The Spanish club held its second meeting Nov. 4. After the minutes were read, several Spanish songs were sung by the members of the club. A short talk was given by Myrtle Cates on "Shopping in Mexico." Miss Foster made an interesting talk on the "Mexican Orchestra," which presented a program in Amarillo recently. Many enjoyable things will be accomplished this year by the Spanish club.

S. P. Q. R.

The Latin club began its meeting by singing, "Massa's in the Cold, Cold Ground," "America," and "Annie Laurie" in Latin, but were nearly drowned out by the rousing tones of "Carry Me Back to Old Virginia," sung by the boys in the study hall. Verlin Furlow read an enjoyable poem, "The Description of the Future Life." George Brewer read the minutes of the last meeting.

Home Ec Club

The third year girls are putting into practice the things they learn from their texts by redecorating the home economics class room.

Their color scheme is old ivory and brown. The curtains are to be tan, the tables old ivory and the waste basket will be the bright color note of the entire room.

Tuesday afternoon the girls went shopping in Canyon and returned with a few cans of paint, marquette for the curtains, and several new ideas.

When finished the room will present a pleasing interior and will be decorated in the best of taste.

Home Ec.

The regular meeting of the "Stitch and Sizzle" club met Tuesday afternoon in the home economics room. A business meeting was held at the first meeting. Pins were ordered for the members and are expected to arrive sometime soon.

The program was a "mix-up" program. Popular songs were acted out by different groups to the amusement of the members. A talk was given by the president, Bib Jameson.

The constitution of the club was read and accepted by the members.

Coach Brady Adds To His Record in Title Championship

Edgar Brady, serving his first year at the head of the Canyon High School Eagles has added much to his reputation as a successful coach in leading the Eagles to win the district title in the Class B division of the interscholastic league.

Brady's success as a coach is outstanding in the time that he has been coaching. His method has proven to be of the winning calibre.

Despite the fact that Brady has been coaching only four years, he has two football championship teams, one basketball, two track and one baseball teams to his credit. His work at Canyon high is even more creditable in view of the fact that he began as a new man among strange boys this year. Then too, the material around which he has built the team was mostly green and inexperienced, as the Eagle squad felt the heavy blow of graduation last year. Many of the Eagles outstanding men of 1929, including "Cow" Williams, outstanding player of the Buffaloes, were lost to the squad.

Chapel

Peals of laughter were heard from the student body of Canyon High when the Dramatic Club presented a one act play entitled "His New Dress Suit."

The characters were as follows: Mrs. Harding—Louise Wester. Betty Harding—Louise Middleton.

Teddy Harding—Robert Black. Johnny Drake—Irving Gamewell. The scene was laid in the living room at the Harding home. It was Betty's wedding day and therefore there was much excitement. Every incident was comical.

The students enjoyed it very much and hope that the dramatic club will give them another demonstration of their work in the near future.

EAGLE SQUAD WILL BATTLE AGAINST CLAUDE MUSTANGS FOR TITLE IN SECTION "B"

Classes

Inter-Class Debate

Inter-class debates are being held this week between both boys and girls. The question is "Resolved, That the eighteenth amendment should be repealed." From these debates a team of girls and a team of boys will be selected to attend the debate and speech tournament at Amarillo in December.

Juniors

The junior class met Wednesday to decide on a motto for their class for the coming year.

Several mottos were given and the class decided on "Live and let live" which was suggested by Willard Middleton, the meaning of which was to keep your class in progress and not to destroy the progress of another. They also discussed plans for the raising of money in order to put the Junior Queen on the throne this year.

Seniors

The senior class rings were ordered Thursday. The rings will be received in a month or six weeks. The rings are the same that the seniors for three years have had.

Class Dues

Why don't you pay your class dues? as the chief question discussed at the regular sophomore class meeting Wednesday. After the old business was off hand, a committee was chosen to write a song for the class. The remainder of the period was spent giving some of those good old pep songs and yells, under the direction of the pep leaders, Jeanette Golden and Edwin Whitfield.

Well, a new crop of business improvement prophecies are coming along.

THE EAGLES LIGHT BUT FAST ELEVEN STAND A GOOD CHANCE DISTRICT TITLE.

The Canyon Eagles will fight the Claude Mustangs Friday or Saturday for the championship of Section B, District One.

The Eagles played the Mustangs once before in a practice game and defeated them 7-0. But they will have to play a much more determined team and on a strange gridiron. This game will be one that will be worth all you have to pay to see it.

The winners of this game will play the winners of the Memphis-Dalhart game for the district one championship. The winners of this district will play the winners of the Floydada-Lockney game for the bi-district title. Floydada beat Canyon 26-6 in a practice game.

GIRL SCOUTS

The Girl Scouts are moved at last. Last week they got settled in their new quarters at the Cash home. They will now be able to start work on their tests.

Cosmeticians are doing an increasing business. Alas, even the good dye young these days.

The national horseshoe pitching contest is to be held in Chicago this year. It ought not be difficult to get ringers there.

The girls' assembly under the sponsorship of Miss Rusk has been organized and a series of interesting programs outlined. The girls who do not go to clubs on Tuesdays meet in the auditorium and discuss matters of interest to girls. The programs are based on friendship, manners, and problems that all must contend with sooner or later. These programs are interesting as well as beneficial and are enjoyed very much by each girl present.

One group of girls meet one week, and a different group the next. In this way no one is likely to become tired of the assembly.

It is a fine thing to be "Johnny-on-the-spot" but in Chicago it's mighty dangerous.

"Faith"

One of the most important factors in the development of a section is adequate light and power facilities; unlimited power at reasonable rates. The growth of the Panhandle-South Plains region has been remarkable, yet its resources have been scarcely touched. We may reasonably expect even greater development in the future. Believing this, and striving at all times to keep ahead of the demands of this section for power and light, Texas Utilities Company has found it necessary to erect a new power plant to supplement its present facilities and guarantee unlimited service.

Tuco Station is the new steam-driven electric generating plant being built by Texas Utilities Company, midway between Lubbock and Plainview, approximately 2 1/4 miles north of Abernathy. The equipment in this station is of the most modern design; the last word in engineering practice.

This plant has an ultimate capacity of 60,000 horsepower, 10,000 of which will be in operation in the near future.

You are always welcome at Tuco where many things of interest will be shown you.

Wayside Items

Light rains falling will benefit wheat and some other things. Fall turnips for instance.

Attendance at Sunday School held at auditorium was very good. Miss Aline McGehee at W. T. spent the past week end at home, returning Monday morning to meet an eight o'clock class.

Phil Rawson of New Braunfels Texas, was a visitor at W. D. McGehee's Friday. They visited the Palo Duro and other places Saturday and Sunday, both leaving Monday for an extended southern trip via Hereford, Carlsbad Cavern and other points.

Tom and Ewell Casey had their tonsils removed the past week. Dr. McFarling doing the work. The latter is not getting along as well as could wish.

J. C. Payne, wife and Boyce Fuller accompanied by Mesdames Bessie Lane, Myrtle McGehee and Ida Sluder motored to Claude Monday to go before Commissioners Court in interest of retaining our county demonstrator, Miss Elsie Phillips. A number of different home demonstration club members of Armstrong county were there on same business, with Miss Grubbs, state

agent, Mrs. Val Laycock, former demonstrator to help. Received little or no encouragement as they want a farm demonstrator and the county is not able to finance both under present tax valuations.

Mrs. May Guest and Mrs. Mose Wesley of Happy visited with Mrs. Susie McGehee Sunday.

M. E. Counterman and family visited the parental Sluder home Sunday afternoon.

W. C. McGehee, wife and Dickie motored to Amarillo Monday.

Henry Harrell and family, J. C. Payne and family were dinner guests at Brown Byrd's Sunday.

George Hancock, wife and Jerry Lane of Pampa spent Saturday night at the parental Lane home.

Irving Lane visited home folks the past week end.

Melton McGehee of Lubbock High, visited at home recently.

Mrs. Ida Sluder visited Mrs. Grace Counterman Wednesday.

Palo Duro Items

A large number of people from this vicinity attended the farewell party given by Mr. and Mrs. L. C. Ruthardt, who live in the Rusk community last Saturday night. All kinds of dance and party games

were played until a late hour. Refreshments of Delicious apples and nut candies were served to about sixty people. All present expressed their regrets in losing this popular family, but wish them good luck and happiness in their new home near Dumas. They are planning on moving in the near future.

Mr. and Mrs. B. Dowlin and boys, Mr. and Mrs. Bob Burgess and son from near Canyon were callers in the Fred Marshall home Sunday. In the afternoon a trip was made to the Axtell ranch to see Marion Hollabaugh from Happy ride an outlaw horse. The horse belongs to Jack Roach of Amarillo.

Miss Phyllis Albers was reported quite sick the first of this week with scarlet fever. She is improving rapidly and no other cases up to date.

Mr. and Mrs. Cass Jennings and daughter Dorothy, were visitors in Lubbock this last week end.

Miss Clara Miller was absent from school most of this week on account of throat trouble.

Miss Agnes Moore from Canyon visited Miss Hazel Lowry Tuesday of this week.

Miss Frances Marshall visited Miss Inez Padgett Sunday.

Mrs. Henry Miller and daughters were shopping in Canyon Saturday afternoon.

Miss Leveta Ruthardt visited Miss Martha Miller Sunday afternoon.

Marion Hollabaugh, Bob Parsons have been helping Fred Marshall stack feed for the past two weeks.

Gus Leseberg called on Fred Marshall Sunday morning.

Fairview Breezes

There was a good many out for the singing at the school house Sunday night. Mr. and Mrs. Rex Roby, their brother and sister of Sunny Hill, Mrs. Ellis Knox and son Lester, of the same place. Also a number of Wayside boys were present. There were several special songs sung by Mr. Roby and Mr. Bonds, also by Mr. and Mrs. Roby and Mr. Bonds, also Mr. and Mrs. Bonds. They certainly were fine. We sure hope they will be present next Sunday night at the same place.

A number from Fairview took their lunch and spent Sunday in the canyons. A few Happy boys and girls were also present, also a few Waysiders.

Miss Irene Wesley left the first of the week for Amarillo where she will work for her aunt for awhile. Mr. and Mrs. W. B. Williams and daughters, also Mrs. Felix

Legate of Childres, were visiting in this community Sunday and Monday.

Bill James and family visited in the C. C. James home of Canyon Sunday.

The pie supper Friday night was well attended. The pies brought \$25.00 Miss Iva Lee James was voted prettiest girl and E. Hawes of Canyon was voted the ugliest man. The money will go for school equipment.

Mr. and Mrs. Edwin Wesley spent Sunday in the Alvin Wesley home.

A number from Fairview attended the drawing at Happy Saturday. Mrs. W. M. Kinsey drew a one dollar prize.

Mrs. W. M. Kinsey and Mrs. H. M. Kinsey visited in the Chas. Sutton home Monday.

Eugene Jr. and Dallas Zachry spent the week end at home.

J. M. Allred Jr. spent the week end at home.

Miss Opal Sutton spent a few days last week with Mr. and Mrs. Albert Legate.

Mrs. J. W. Wesley and daughter spent the week end at home.

Mr. and Mrs. Bill Wesley and son, also Mr. and Mrs. C. L. Wesley and daughters spent Sunday in the J. W. Wesley home.

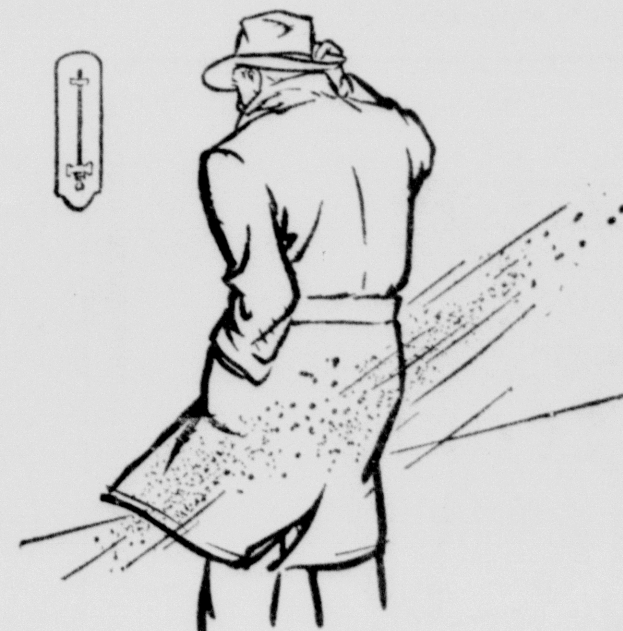

We have received word that Miss Opal Washburn died at Granfield, Okla., Friday. She has made Fairview her home for the last seven or eight years until recently, she has made Granfield her home. We have not learned where burial will be. C. E. Castleberry and Mr. and Mrs. A. E. Wesley, also Mrs. H. H.

Sutton and son left Friday soon after they received word about her death, so they could be in time for the funeral.

The man who usually insists that a woman's place is in the home generally spends mighty little of his time there.

If you can remember when rock candy was made with a piece of twine running through it, then you are an old timer.

Now is the time to change to Germ-Processed oil . . . It's DE-WAXED. That means easy starting . . . and its Penetrative Lubricity means safer Lubrication during the trying months ahead

Have you passed the noonday of Life?

Then make the down road happy by keeping your strength and health. An unflinching warning of a rundown condition is the diminishing of the red-blood-cells.

A DEFICIENCY of red-cells in the blood is usually followed by physical exhaustion, loss of appetite, underweight, nervousness and pimples and boils. When your red-blood-cells are only 80% you are NOT yourself—60% is very dangerous.

Common sense suggests that every possible step be taken to correct such a condition. Take S.S.S. before each meal. It will

build up and enrich your blood, give you new life and vitality! Your appetite will pick up—you will feel like yourself again! Keep the down road bright by keeping your red-blood-cells fighting for you. Get the large size. At all drug stores. S.S.S. Co.

CONOCO
GAS AND OILS

R. E. BALL
SERVICE
STATION

Wholesale and Retail

Is your car hard to start these cold mornings? Let that be a reminder that these are danger months for your motor!

It takes more turning-over to start, and more running to warm-up your motor during the cold months. So now, more than ever, you need the extra protection of this oil with two big cold-weather advantages!

Conoco Germ-Processed Motor Oil is de-waxed to prevent congealing at low temperatures. That's the first reason. Second, its penetrative lubricity insures instant lubrication at the first touch of the starter. By decreasing friction, Germ-Processed oil adds to the ease of starting.

You may be able to buy some other oils

which are de-waxed, but there is only one oil with penetrative lubricity, only one that penetrates metal-surfaces and never drains away from working parts.

It's Conoco Germ-Processed Motor Oil. Ask for it whenever you see the Conoco Red Triangle.

ADDITION OF M. A. WORK IS APPRECIATED

SUPERINTENDENTS SEND CONGRATULATIONS IN LETTERS TO HILL.

Since the announcements made last month regarding W. T.'s offering graduate work, many letters of congratulation have been received by various of the college officials. The following are extracts from some of those received by President Hill from Texas superintendents.

Superintendent McIntosh of the Amarillo schools writes as follows: "Please accept my congratulations on this recognition. We feel perfectly sure that W. T. will meet this situation with credit to itself and to the citizenry of this part of the state."

"It shall be my pleasure to cooperate with you in every possible way in urging teachers in the Amarillo public schools and applicants for teaching positions here to attend your institution for further training. . . . We are glad to know you are going to offer graduate work that will mean something in special preparation for professional teaching."

From Superintendent E. G. Littlejohn of Galveston comes this word: "That is fine. Congratulations all 'round."—and quoting from President Hill's message to him, he continues: "This pleases me especially. We are going to offer a graduate degree that will mean something in the matter of special professional preparation for teaching. May this purpose be never lost sight of."

Bishop E. C. Seaman, of the Episcopal church, living in Amarillo, says: "I am delighted to know that the college is to offer graduate work looking to the Master's degree, and I shall take great pleasure in spreading the information as far as I can, beginning the mention of it in the North Texas Adventure for November."

Charles E. Davis, superintendent at Quanah, writes: "Permit me to congratulate you and other faculty members of the college on the splendid progress that W. T. S. T. C. is making. I am sure that the authorization . . . to confer the Master's degree will be a forward movement."

W. I. Wilkins, superintendent at Sudan asks Mr. Hill to "accept my congratulations on the opportunity now extended our teachers colleges to do graduate work."

From closer home comes a letter from C. A. Cryer, superintendent of the Dimmitt schools, saying: "We congratulate the faculty there on their success in securing graduate work. You deserve a lot of credit for untiring efforts; so we rejoice with you."

These and other communications

indicate clearly the attitude of educators over Texas regarding the addition of graduate work to the state teachers colleges.

From investigations made during Homecoming Nov. 1, it has been found that many ex-students and W. T. Graduates are looking forward to doing graduate work here.

FIRST LYCEUM WILL BE NEXT MONDAY NIGHT

PROGRAM COVERS DRAMATIC LITERATURE THROUGH MANY AGES.

Perhaps the most unique dramatic program ever offered in W. T. will be given by Mr. V. L. Granville, famous English actor, when he comes here November 17 in his "Dramatic Interludes", the first lyceum of the season.

Making many costume changes, and carrying unique and effective stage settings and lighting effects which are operated by his personal stage manager, Mr. Granville will run the gamut of tragedy and comedy, beginning with Sophocles and ending with George du Maurier.

Program in Detail
Here is the program to be presented here, given in detail and sent by Mr. Granville himself:

Introductory Remarks.
First Group of Impersonations.

From the Greeks to Shakespeare.

1. Oedipus, from "Oedipus Rex"—Sophocles.

2. Ergasilus, from "The Captives"—Plautus.

3. Faustus, from "The Tragical History of Dr. Faustus"—Marlowe.

4. Falstaff, from "The Merry Wives of Windsor"—Shakespeare.

5. Duke of Gloucester, afterwards "Richard III"—Shakespeare.

Ten Minutes Intermission

Second Group of Presentations.

From Moliere to the Present Day.

6. Harpagon "The Miser"—Moliere.

7. Mrs. Malaprop, from "The Rivals"—Sheridan.

8. Fedya, from "The Living Corpse"—Tolstoy.

9. Francois Villon, the great French poet—Selected.

10. Cyrano de Bergerac—Rostand.

11. Svengali, from "Trilby"—George du Maurier.

Indian Ball Bats

Are Latest Gifts

Made to Museum

Among the latest contributions to the Panhandle-Plains Historical Society Museum are two Indian ball bats, loaned by Mr. and Mrs. W. M. Cravens of Pampa. Mr. T. D. Hobart, president of the society secured them.

These bats were last used in 1905 in a game played between the Chickasaw and Choctaw Indian tribes. They resemble a hockey stick in shape.

One of the most pitiful sights is that of a middle-aged woman who has tried to paint what she once looked like.

Sunny Hill School

The attendance at Sunday School was a little below normal last Sunday. It is hoped that all the members will be present next Sunday and that others will come.

We are having quite a lot of singing before and after Sunday School. Messrs. Roffey, Hawes, and Gordy came out from Canyon to help in the singing. We enjoyed the special music by these men and our song leader and pianist, Mr. and Mrs. Bonds. It is hoped that a singing school may be conducted at this place in the near future. We invite all music lovers to come and join us.

Armistice Day was observed at the chapel hour here Tuesday. Individuals of the upper grades read patriotic poems and told stories appropriate for the occasion. Songs were sung and the flag was saluted by all.

Mr. and Mrs. Wheeler Knox of Roy, N. M., surprised his mother and brother here a few days ago by a short visit.

Several folks from this community attended the pie supper at Fairview last Friday night, and the singing there Sunday night.

Mr. and Mrs. Rex Roby and Ernest and Elora Duncan motored to Amarillo Friday night after returning from the supper at Fairview. They spent an enjoyable day Saturday with relatives.

Remember that Sunday School begins promptly at 2:30 p. m., and after that a lot of good singing.

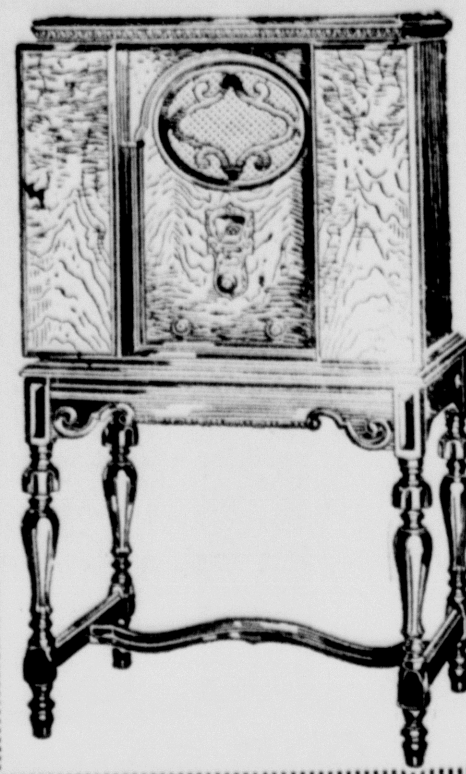

Umbarger Items

Mr. and Mrs. J. G. Batenhorst and Miss Josephine Wiecek returned last week from an extended visit with relatives and friends in Nebraska.

Many friends of Mr. and Mrs. Joe Friemel were entertained with a dance at the Friemel home Sunday night.

Miss Annie Stocker, who spent last week with her parents, returned to Amarillo Saturday.

Apolonio Myia, who is attending

RELIEF FROM CURSE OF CONSTIPATION

A Battle Creek physician says, "Constipation is responsible for more misery than any other cause."

But immediate relief has been found. A tablet called Rexall Orderlies has been discovered. This tablet attracts water from the system into the lazy, dry, evacuating bowel called the colon. The water loosens the dry food waste and causes a gentle, thorough, natural movement without forming a habit or ever increasing the dose.

Stop suffering from constipation. Chew a Rexall Orderlie at night. Next day bright. Get 24 for 25c today at the nearest Rexall Drug Store. City Pharmacy.

Help Keep Canyon Clean.

And this here, my good woman, is the MONITOR TOP

The what sir? The MONITOR TOP, madam
—the General Electric Monitor Top

THE language of this young gentleman may be a trifle elegant—but his facts are right! That is the Monitor Top—hailed as the most outstanding contribution of science to modern refrigeration.

It is the Monitor Top that is responsible for the General Electric Refrigerator's splendid record of service. In the Monitor Top, the General Electric Refrigerator's entire mechanism is sealed-in-steel—so that air, dirt and moisture are helpless to get inside.

What comfort, what luxury, what true economy in owning such a refrigerator! The General Electric Refrigerator runs on a few pennies a day. How inexpensive it is to own! And most people buy on

our easy time payment plan. How easy the General Electric Refrigerator is to buy! Why not drop in and let us show you the many ways you can save money by buying a General Electric Refrigerator now?

Penalty—One-ninth (1-9th) of bill will be added if not paid within 10 days after date rendered.

The Company reserves the right to change above rates at any time, on 30 days notice, by publication or individual notice.

Pass Your Dollar Along!

THIS matter of spending is a "round robin" in which the dollar or its equivalent in wages, profit, value or gratified desire returns to the original spender. But when one of us breaks the chain by keeping the dollar in his pocket and refuses to pass it along it only influences others to do the same thing and it leaves the next in line totally without means to continue the chain.

"Keeping money in circulation" implies just what it says—the circulating of money. When you buy, the merchant requires more goods to replace what you have taken away. He draws on the manufacturer; the manufacturer increases production and employs more labor; as the laborer earns more, he buys more clothes, food, furniture, amusement—the com-

modities which you sell or produce and hence the dollar you spend comes back to you.

We've started on the up-grade to a resumption of Prosperity now. A noted economist said in convention in Chicago the other day, "Americans today are consuming more goods than are being made up for replacement at present." This is the fore-runner of increased production and increased employment.

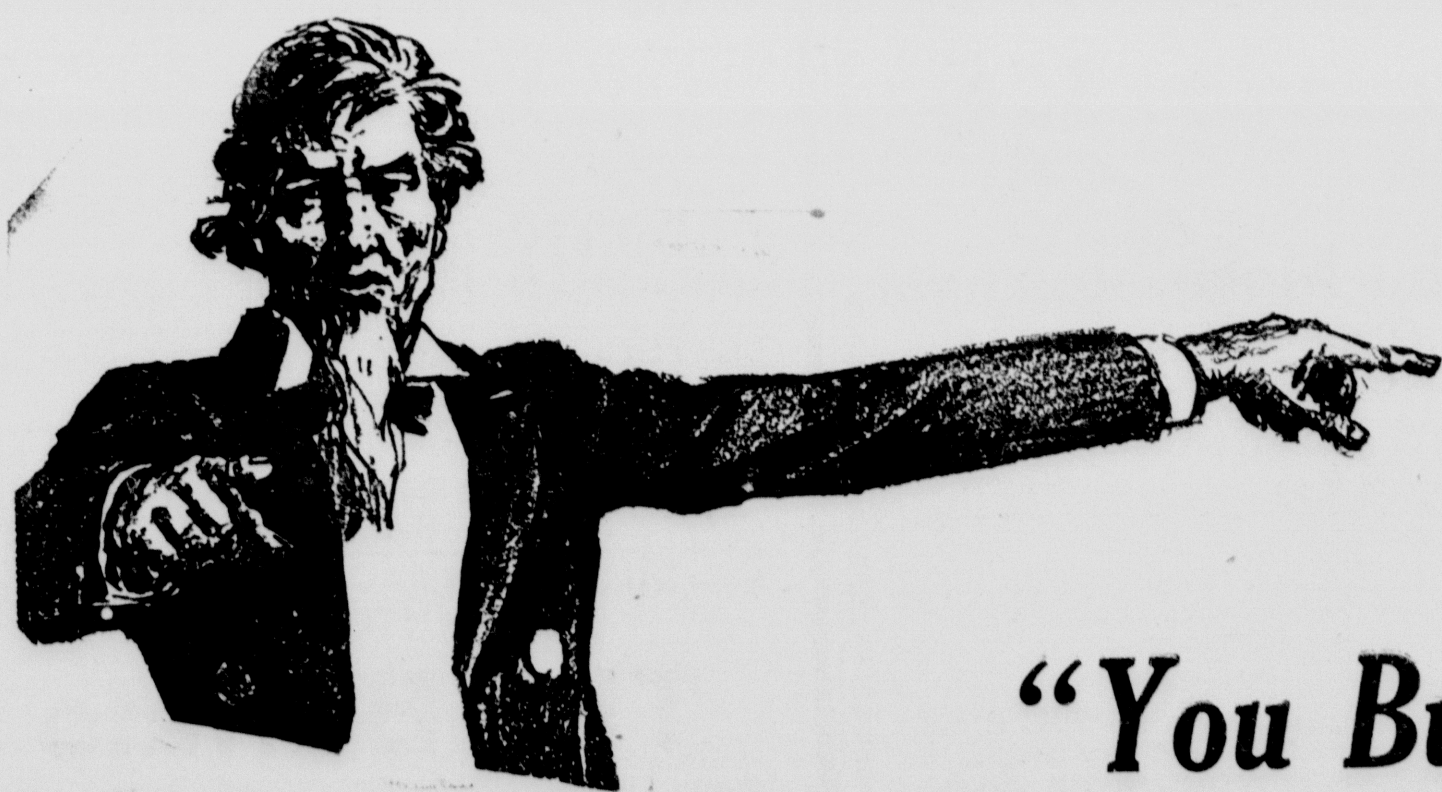

Continue spending and the wheels of commerce and industry will soon be humming in the key of prosperity but it's the degree in which you circulate your dollars that will determine the tempo of our return to normalcy.

Features That Appeal to The Home Owner.

1. Warmer Floors. The coldest part of a room is the first three inches above the floor. Supreme floor furnaces draw the cold air directly from floor line.
2. Instant Regulation. Meets any weather change from a low soft heat to an intense powerful heat generated in a few minutes.
3. Clean. All dirt as from coal and ashes eliminated, no joints or seams to open up and cause smoked walls, curtains or decoration.
4. Saves Time. The average coal furnace requires eight hours a week for refueling and removal of ashes. The Supreme adds one whole day to your time each week.
5. Eliminates Investment in Fuel. Not necessary to pay for winters coal supply in summer. With the Supreme you pay after fuel has been used.
6. Offers Advantages of Central Heating Plant at Lower Operating Cost. Eliminates long pipe runs from central plant and excessive heating losses in basement.
7. Has Greater Utility. Used in early fall or late spring, economical to operate to take out chill or dampness from room.
8. Eliminates Hazards. No unhealthful effects of open flame burner as all unburned products are carried off through vent.

LET US FIGURE WITH YOU ON YOUR HEATING
PROBLEM.

BOY SCOUTS ATTEND HONOR COURT FRIDAY EVENING

A number of the Canyon Boy Scouts attended the Court of Honor and pep rally of Panhandle Boy Scouts held last Friday evening.

The Canyon boys who received honors at the meeting were Hampton Lisle who received a second class badge and Jack Pitts who was awarded a first class badge, four merit badges, and a Star scout badge.

Motion pictures of boys taken at Summer camp were shown and explained by Chief Marvin J. Paul. Transportation was furnished the boys by Travis Shaw and Bill Bryant.

PHIDIAS ART CLUB HAS EXHIBIT OF NEW PRINTS

The Phidias Art Club of the College has just received and placed on exhibit a number of Japanese woodcut prints. These prints are very unusual and beautiful.

The general public is invited to see the exhibit which will be here until November 24. The prints are for sale and range in price from 25c to \$1.50.

COMMISSIONERS COURT IN QUARTERLY SESSION

The Commissioners Court is in regular quarterly session this week. Judge B. F. Fronabarger states that no business outside the regular routine has been transacted during the week, which includes checking of the quarterly reports of the various county officers.

The session will likely be ended by Friday night.

SINGING WILL BE HELD SUNDAY AT TIERRA BLANCA

To the singers of Canyon and Randall County:

Sunday, November 16, there will be a singing at the Tierra Blanca school house, which is located four miles east and four miles south of Canyon. The meeting will begin at 2:30 o'clock. There will be many visiting singers from several neighboring counties.

G. R. STRATTON, President

ARTIST PAINTS CANYONS

It has been stated by several parties that an artist by the name of Jenkins is now painting a scene of the Palo Duro Canyon. He is said to be from New York and has studied a number of years in Paris. This is his first work in the western part of the country and he has been high in his praise of the beauty of the canyons.

BUILD TRENCH SILOS

A number of Randall county farmers are doing extensive experimenting with trench silos as a new way of curing feed for stock. There have been five trench silos dug so far this fall in the county. W. H. Upchurch states and it is thought more will be dug soon. Many advantages to stockmen is pointed out by users of the trench silos, in curing feed for the stock.

OVERTURNS CAR

Dr. S. L. Ingham's car was overturned and badly damaged Tuesday night north of Canyon on account of the mud at the unpaved gap just north of the Santa Fe viaduct. No one was injured in the accident.

REMOVE DEBRIS OF OLD CAFE BUILDING ON 4th

Workmen have completed removing the debris of the old Canyon Inn building, which was almost burned to the ground several weeks ago by a fire which threatened to do more serious damage than resulted, and was checked only by good work on the part of the fire department.

The small frame building occupied by the Canyon Produce at that time and which was slightly damaged by the fire has also been removed.

It is stated that the erection of a new building on the location is being considered, but no public announcement has been made.

JUDGE RANDALL'S ENTRY IN MASTER FARMER CONTEST

H. L. Atkins, Jr., field editor of the Progressive Farmer in charge of the State Master Farmer contest, sponsored by that magazine was in Randall county over the week end for the purpose of scoring Randall county's entry in the contest.

The winners of this contest, ten in number, who are classed as the highest scoring farmers in the state, with none designated as first second and so on down the line, are given a banquet during the month of January at Dallas with all expenses paid.

SEND MOVING PICTURES TO WOMEN'S CONVENTION

Moving pictures of the Palo Duro Canyons were sent to Houston to be shown to delegates at the Texas Federated Club Women's convention in session there, Travis Shaw states. The colored pictures made in the canyons by Mr. Shaw were sent to San Antonio several days ago to be forwarded to Houston for showing at the convention. Other black and white pictures belonging to the Amarillo Chamber of Commerce were also sent to Houston.

REV. BEAVERS PREACHES.

Rev. M. M. Beavers, presiding elder of the Plainview District of the Methodist Church, preached Sunday morning at the local Methodist Church, in closing the year's work of the local congregation.

It is rumored in church circles that Canyon will be transferred from the Plainview to the Amarillo district for the coming year.

Rev. Beavers stated that unless something unforeseen happened at conference, Rev. C. E. Jameson would be returned as pastor of the Canyon church for the coming year.

PROBATE NOTICE
THE STATE OF TEXAS
To the Sheriff or any Constable of Randall County—Greeting:
You are hereby commanded to cause to be published from twenty days, exclusive of the first day of publication, and the return day hereof, in some newspaper of general circulation published in said county, which has been continuous for a period of not less than one year, the following notice: THE STATE OF TEXAS.
To all Persons interested in the estate of Robert Lee Wesley, deceased.

You are hereby notified that Mrs. Maude Wesley, community administratrix of the estate of Robert Lee Wesley, deceased, has filed in the County Court of Randall County, Texas, where said estate is pending, her final account with said estate and an application to be discharged as such administratrix and that she and her bondsmen be discharged from further liability to said estate and that same be closed, which application was filed in said court on the 10th day of November, A. D. 1930, and will be heard at the next regular term of the County Court of Randall County, Texas, commencing on the Second Monday in December, A. D. 1930, the same being the 8th day of December, A. D. 1930, at the court house in Canyon, Randall County, Texas, at which time and place all persons interested in said estate are hereby required to appear and contest said application if they see proper.

HEREBY FAIL NOT, but have you then and there before said court on the first day of the next term thereof this writ with your return thereon showing how you have executed the same.

GIVEN under my hand and seal of office, this 10th day of November, A. D. 1930.
